SUMMARY

This summary provides an overview of what are, in the opinion of the Issuer, the main risks associated with the Issuer and the notes (the "**Notes**") and the certificates (the "**Certificates**") and the warrants (the "**Warrants**") (together, the "**Securities**") issued by the Issuer under this Programme. This summary is not exhaustive. It should be read as an introduction to this Programme. Investors should base any decision to invest in the Securities on a review of this Information Memorandum as a whole (including any supplements thereto) as well as the relevant Final Terms and especially the risk factors contained therein.

Commerzbank Aktiengesellschaft (the "**Issuer**", the "**Bank**" or "**Commerzbank**" and, together with its consolidated subsidiaries, "**Commerzbank Group**" or the "**Group**") may have civil liability in respect of this summary; such liability, however, applies only if the summary and the translation (if any) are misleading, inaccurate or inconsistent when read together with the other parts of this Information Memorandum and the relevant Final Terms.

Where a claim relating to information contained in this Information Memorandum and the relevant Final Terms is brought before a court in a member state of the European Economic Area, the plaintiff investor may, under the national legislation of such member state, be required to bear the costs of translating this Information Memorandum (including any supplements thereto) and the relevant Final Terms before the legal proceedings are initiated.

A. SUMMARY OF INFORMATION AND SUMMARY OF RISK FACTORS RELATING TO THE SECURITIES

The purchase of Securities issued under this Programme is associated with certain risks. **The Issuer expressly points out that the description of the risks associated with an investment in the Securities only mentions the major risks that are known to the Issuer at the date of this Information Memorandum. The description of the risks associated with an investment in the Securities does not purport to be exhaustive.**

In addition, the order in which such risks are presented does not indicate the extent of their potential commercial effects in the event that they are realised, or the likelihood of their realisation. The realisation of one or more of said risks may adversely affect the value of the Securities themselves and/or the assets, finances and profits of Commerzbank Group. This could have also a negative influence on the value of the Securities.

Moreover, additional risks that are not known at the date of this Information Memorandum or currently believed to be immaterial could likewise have an adverse effect on the value of the Securities.

The occurrence of one or more of the risks disclosed in this Information Memorandum, any supplement and/or the relevant Final Terms or any additional risks may lead to a material and sustained loss and, depending on the structure of the Security, even result in partial loss or even the **total loss** of the capital invested by the investor.

Investors should purchase the Securities only if they are able to bear the risk of losing the capital invested, including any transaction costs incurred.

Potential investors in the Securities must in each case determine the suitability of the relevant investment in light of their own personal and financial situation. In particular, potential investors should in each case:

- have sufficient knowledge and experience to make a meaningful evaluation of the Securities, the merits and risks of investing in the Securities and/or the information contained or incorporated by reference in this Information Memorandum or any applicable supplement and all the information contained in the relevant Final Terms;
- have sufficient financial resources and liquidity to bear all of the risks associated with an investment in the Securities;

- understand thoroughly the terms and conditions pertaining to the Securities (the "**Terms and Conditions**") and be familiar with the behaviour of any relevant underlying share, index, metal (i.e., precious and industrial metal), futures contract, bond, currency exchange rate, interest rate, fund or a basket of underlyings or an index that is composed of any of the aforementioned values, commodities or rates (each an "**Underlying**") and the financial markets; and
- be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect the value of their investment and be able to bear the associated risks.

These risk warnings do not substitute advice by the investor's bank or by the investor's legal, business or tax advisers, which should in any event be obtained by the investor in order to be able to assess the consequences of an investment in the Securities. Prospective investors of the Securities should consider their current financial circumstances and investment objectives and always consult their own financial, legal and tax advisers with regard to the suitability of such Securities in light of their personal circumstances before acquiring such Securities.

Expressions defined or used in the Terms and Conditions or elsewhere in the Summary and the Information Memorandum shall have the same meaning as ascribed to them in the section "Summary".

The Securities issued under this Programme are subject to - potentially major - price fluctuations and may involve the risk of a **complete or partial loss** of the invested capital (including the costs incurred in connection with the purchase of the Securities). Since interest (in the case of Notes) or the Redemption Amount or the Cash Amount (in the case of Warrants) and/or any additional amounts are linked to one or more Underlying(s) or to one or more formulae ("**Structured Securities**"), the risk associated with the investment in the Securities will be increased. Thus, any investment in the Securities is an investment that might not be suitable for all investors.

Investors should especially note that the past performance of an Underlying should not be regarded as an indicator of its future performance.

The Securities have complex structures which the investor might not fully understand. The investor might therefore underestimate the actual risk that is associated with a purchase of the Securities. Therefore, potential investors should study carefully the risks associated with an investment in the Securities (with regard to the Issuer, the type of Securities and/or the Underlying(s)), as well as any other information contained in this Information Memorandum, any supplements thereto as well as the relevant Final Terms, and possibly consult their personal (including tax) advisors. Prior to purchasing Securities, potential investors should ensure that they fully understand the mechanics of the relevant Securities and that they are able to assess and bear the risk of a loss (possibly a **total loss**) of their investment. Prospective purchasers of Securities should in each case consider carefully whether the Securities are suitable for them in the light of their individual circumstances and financial position.

It is possible that the performance of the Securities is adversely affected by several risk factors at the same time. The Issuer, however, is unable to make any reliable prediction on such combined effects.

Certain factors are of great significance with regard to the assessment of the risks associated with an investment in the Securities issued under this Programme. These encompass both risks relating to the Underlying(s) and risks that are unique to the Securities as such.

Such risks include inter alia,

- that the payments to be made under the Terms and Conditions of the Securities depend on the performance of one or more Underlying(s), so that the Redemption Amount or the Cash Amount, as the case may be, payable at the Maturity Date may be lower than the original purchase price of the Securities or it could be possible that a payment may not take place at all. As the Securities are linked to the performance of one or more Underlying(s), the performance of the Underlying also has an effect on the value of the Securities. The value of the Securities

can be positively or inversely correlated to the performance of the Underlying (without taking into account special characteristics of the Securities);

- that, pursuant to the Terms and Conditions, payments under and/or the redemption of the Securities can occur at times other than those expected by the investor (e.g., in the case of an early termination in the event of an extraordinary event as described in the Terms and Conditions);
- that investors may be unable to hedge their exposure to the various risks relating to the Securities;
- that an Underlying to which the Securities relate ceases to exist during the term of the Securities or might be replaced by another Underlying, and that the investor might not always know the future Underlying or its composition when purchasing the Securities; and
- that the value of Securities on a possible secondary market is subject to greater fluctuations and thus greater risks than the value of other securities as it is dependent on one or more Underlying(s). The performance of an Underlying is in turn subject to a series of factors beyond the Issuer's control. Such factors are influenced to a significant degree by the risks on the share, debt and foreign exchange markets, the interest rate development, the volatility of the Underlying(s) as well as economic, political and regulatory risks, and/or a combination of the aforesaid risks. The secondary market for Securities will be affected by a number of additional factors, irrespective of the creditworthiness of the Issuer and the value of the respective Underlying. These include, without limitation, the volatility of the relevant Underlying, as well as the remaining term and the outstanding volume of the respective Securities.

For a more detailed overview of the risks relating to the Securities and the Issuer investors should consult the section "Risk Factors" further below.

RISK FACTORS

The purchase of Securities issued under this Programme is associated with certain risks. In respect of Securities that, in view of their specific structure, require a special description of the relevant risk factors, a supplementary description of the special risk factors associated with the Securities in addition to the list set out below will be included in a separate document (the "**Final Terms**") where required. The information set forth hereinafter and in the Final Terms merely describes the major risks that are associated with an investment in the Securities in the Issuer's opinion. In this regard, however, **the Issuer expressly points out that the description of the risks associated with an investment in the Securities does not purport to be exhaustive.**

In addition, the order in which such risks are presented does not indicate the extent of their potential commercial effects in the event that they are realised, or the likelihood of their realisation. The realisation of one or more of said risks may adversely affect the value of the Securities themselves and/or the assets, finances and profits of Commerzbank Group. This could have also a negative influence on, or the value of, the Securities.

Moreover, additional risks that are not known at the date of this Information Memorandum and the relevant Final Terms or currently believed to be immaterial could likewise have an adverse effect on the value of the Securities.

The occurrence of one or more of the risks disclosed in this Programme, any supplement and/or the relevant Final Terms or any additional risks may lead to a material and sustained loss and, depending on the structure of the Securities, even result in the partial loss or even the **total loss** of the capital invested by the investor.

Investors should purchase the Securities only if they are able to bear the risk of losing the capital invested, including any transaction costs incurred.

Potential investors in the Securities must in each case determine the suitability of the relevant investment in light of their own personal and financial situation. In particular, potential investors should in each case:

- have sufficient knowledge and experience to make a meaningful evaluation of the Securities, the merits and risks of investing in the Securities and/or the information contained or incorporated by reference in this Information Memorandum or any applicable supplement and all the information contained in the relevant Final Terms;
- have sufficient financial resources and liquidity to bear all of the risks associated with an investment in the Securities;
- understand thoroughly the Terms and Conditions pertaining to the Securities (the "**Terms and Conditions**") and be familiar with the behaviour of any relevant Underlying and the financial markets; and
- be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect the value of their investment and be able to bear the associated risks.

These risk warnings do not substitute advice by the investor's bank or by the investor's legal, business or tax advisers, which should in any event be obtained by the investor in order to be able to assess the consequences of an investment in the Securities. Prospective investors of the Securities should consider their current financial circumstances and investment objectives and always consult their own financial, legal and tax advisers with regard to the suitability of such Securities in light of their personal circumstances before acquiring such Securities.

Expressions defined or used in the Terms and Conditions or elsewhere in the Summary and the Information Memorandum shall have the same meaning as ascribed to them in this section "Risk Factors".

RISK FACTORS RELATING TO THE SECURITIES

The Securities issued under this Programme are subject to - potentially major - price fluctuations and may involve the risk of a **complete or partial loss** of the invested capital (including any costs incurred in connection with the purchase of the Securities). Since the interest (in the case of Notes) and/or the amount of the redemption and/or any additional amounts are linked to the performance of an Underlying, the risk associated with the investment in the Securities will be increased. Thus, an investment in the Securities is an investment that might not be suitable for all investors.

Investors should especially note that the past performance of an Underlying should not be regarded as an indicator of its future performance during the term of the Securities.

The Securities have complex structures which the investor might not fully understand. The investor might therefore underestimate the actual risk that is associated with a purchase of the Securities. Therefore, potential investors should study carefully the risks associated with an investment in the Securities (with regard to the Issuer, the type of Securities and/or the Underlying(s)), as well as any other information contained in this Information Memorandum, any supplements thereto as well as the relevant Final Terms, and possibly consult their personal (including tax) advisors. Prior to purchasing Securities, potential investors should ensure that they fully understand the mechanics of the relevant Securities and that they are able to assess and bear the risk of a loss (possibly a **total loss**) of their investment. Prospective purchasers of Securities should in each case consider carefully whether the Securities are suitable for them in the light of their individual circumstances and financial position.

It is possible that the performance of the Securities is adversely affected by several risk factors at the same time. The Issuer, however, is unable to make any reliable prediction on such combined effects.

Additional risks (e.g. in relation to the Underlying(s), payment profiles and structures) may be set out in the relevant Final Terms.

These risk warnings do not substitute advice by the investor's bank or by legal, business or tax advisers, which should in any event be obtained in order to be able to assess the consequences of an investment in the Securities. Investment decisions should not be made solely on the basis of the risk warnings set out in the Information Memorandum (including any supplements thereto) since such information cannot serve as a substitute for individual advice and information which is tailored to the requirements, objectives, experience, knowledge and circumstances of the investor concerned.

1. GENERAL RISKS

Certain factors are of great significance with regard to the assessment of the risks associated with an investment in the Securities issued under this Programme. These encompass both risks relating to the Underlying(s) and risks that are unique to the Securities as such.

Such risks include inter alia,

- that the payments and/or deliveries to be made under the Terms and Conditions depend on the performance of one or more Underlying(s), so that the Redemption Amount or the Cash Amount, as the case may be, payable at the Maturity Date may be lower than the original purchase price of the Security or it could be possible that a payment may not take place at all. As the Securities are linked to the performance of one or more Underlying(s), the performance of the Underlying(s) also has an effect on the value of the Securities. The value of the Certificates can be positively or inversely correlated to the performance of the Underlying (without taking into account special characteristics of the Securities);
- that, pursuant to the Terms and Conditions, the redemption of the Securities can occur at times other than those expected by the investor (e.g. in the case of an early termination in the event of an extraordinary event as described in the Terms and Conditions);

- that a reduction and/or non-occurrence of repayment will occur for the particular reason that insolvency proceedings have been instituted with regard to the assets of the issuer of the Underlying or proceedings comparable to insolvency proceedings under German law are instituted or the issuer of the underlying ceases its payments or announces that it is unable to pay its debts when due or if similar events occur in relation to the issuer of the Underlying;
- that investors may be unable to hedge their exposure to the various risks relating to the Securities;
- that an Underlying to which the Securities relate ceases to exist during the term of the Securities or might be replaced by another Underlying, and that the investor might not always know the future Underlying or its composition when purchasing the Security;
- that various fees are levied by the Issuer, an affiliate of the Issuer or a third party, which reduce the payments under the Securities. For instance, management fees might be levied with regard to the composition and calculation of an index, basket, fund or other Underlying, or performance or other fees might be incurred in connection with the performance of an Underlying and/or components of such Underlying;
- that the performance of an Underlying depends on the expertise of individual persons (in particular if the Underlying is actively managed or the Issuer requires advice regarding the Underlying). If one or more of such persons leave a company that is relevant for the performance of the relevant Underlying or if a contract entered into by any of these persons and the Issuer or the Calculation Agent in relation to the Securities is terminated this may have a material adverse effect on the Securities; and
- that the value of Securities on a possible secondary market is subject to greater fluctuations and thus greater risks than the value of other securities as it is dependent on one or more Underlying(s). The performance of an Underlying is in turn subject to a series of factors beyond the Issuer's control. Such factors are influenced to a significant degree by the risks on the share, debt and foreign exchange markets, the interest rate development, the volatility of the Underlying(s) as well as economic, political and regulatory risks, and/or a combination of the aforesaid risks. The secondary market for Securities will be affected by a number of additional factors, irrespective of the creditworthiness of the Issuer and the value of the respective Underlying. These include, without limitation, the volatility of the relevant Underlying, as well as the remaining term and the outstanding volume of the respective Security.

1.1 Deviation of the initial issue price from the market value and impact of incidental costs

The initial issue price in respect of any Securities is based on internal pricing models of the Issuer and may be higher than their market value. The pricing models of other market participants may deviate from the Issuer's internal pricing models and might produce different results.

The price that might be obtainable in the secondary market for the Securities might be lower than their initial issue price or the price at which the respective Securities were purchased.

1.2 Trading in the Securities, reduction in liquidity

Not every issuance of Securities will be included in the unofficial market of, or admitted to trading on, an exchange. After the Securities have been included or admitted, their continued permanent inclusion or admission cannot be guaranteed. If such inclusion or admission (provided it took place) cannot be permanently maintained, it is possible that it be significantly more difficult to purchase and sell the relevant Securities. Even if the Securities are included or admitted, it will not necessarily result in a high turnover in respect of the Securities.

Generally the Issuer assumes the function of market maker, i.e., the Issuer undertakes to provide purchase and sale prices for the Securities pertaining to an issue subject to regular market conditions. However, the Issuer is neither obliged to take over this function nor to maintain the once assumed function of market maker.

In the event of extraordinary market conditions or extremely volatile markets, the market maker will not provide any purchase and sale prices. A market maker will provide purchase and sale prices for the Securities only under regular market conditions. However, even in the case of regular market conditions, the market maker does not assume any legal responsibility towards the holders of the Securities to provide such prices and/or that such prices provided by the market maker are reasonable. The market maker might undertake towards certain exchanges, in accordance with the relevant rules of the exchange, to provide purchase and sale prices with regard to a specific order or securities volumes under regular market conditions. That obligation, however, will be only towards the relevant exchange. Third parties, including the holders of the Securities, are unable to derive any obligations of the market maker in this regard. This means that the holders of the Securities cannot rely on their ability to sell the Securities at a certain time or price. In particular, the market maker is not obliged to buy back the Securities during their term.

Even if market making activities take place at the beginning or during the term of the Securities, this does not mean that there will be market making activities for the full duration of the term of the Securities.

For the aforesaid reasons, it cannot be guaranteed that a secondary market will develop with regard to the respective Securities that would provide the holders of the Securities with an opportunity to sell on their Securities. The more restricted the secondary market, the more difficult it will be for the holders of the Securities to sell their Securities in the secondary market.

1.3 Determination of the price of the Securities in the secondary market

The market maker, if any, will determine the purchase and sale prices for such Securities in the secondary market on the exchange and off the exchange on the basis of internal pricing models and a number of other factors. These factors include the following parameters: actuarial value of the Securities, price of the Underlying(s), supply and demand with regard to the Securities, costs for risk hedging and risk assumption, margins and commissions.

Some of these factors may not have a consistent effect on the price of the Securities based on the relevant pricing models for the duration of the term, but may be taken into account at the market maker's discretion at an earlier time in a pricing context. This might include, inter alia, a margin included in the initial issue price, management fees and paid or expected payouts on any Underlying or its components (such as dividends), which - based on the characteristics of the Securities - might be retained by the Issuer. Expected dividends of any Underlying or its components may be deducted prior to the "ex dividend" day in relation to the relevant Underlying or its components, based on the expected yields for the entire term or a certain portion thereof. Any dividend estimate used by the market maker in its assessment may change during the term of the Securities or deviate from the dividend generally expected by the market or the actual dividend. This can also affect the pricing process in the secondary market.

Thus, the prices provided by the market maker may deviate from the actuarial value of the Securities and/or the price to be expected from a commercial perspective, which would have formed in a liquid market at the relevant time in which several market makers acting independently of each other provide prices. In addition, the market maker may change the method based on which it determines the prices provided by it at any time, e.g. by changing its pricing models or using other calculation models and/or increasing or reducing the bid/offer spread.

If, during the opening hours of secondary trading in the Securities by the market maker and/or the opening hours of the exchanges on which the Securities are admitted or included, any Underlying is also traded on its home market, the price of the Underlying will be taken into account in the price calculation of the Securities. If, however, the home market of the Underlying is closed while the Securities relating to that Underlying are traded, the price of the Underlying must be estimated. As the Securities issued under this Programme are also offered at times during which the home markets of the Underlying(s) are closed, this risk may affect the Securities. The same risk occurs where Securities are traded on days during which the home market of the Underlying(s) is closed because of a public holiday. If the price of any Underlying is estimated because its home market is closed, such an estimate may turn out to be accurate, too high or too low within hours in the event that the home

market starts trading in the Underlying. Accordingly, the prices provided by the market maker prior to the opening of the relevant home market in respect of the Securities will then turn out to be too high or too low.

1.4 Restricted secondary trading because of non-availability of electronic trading systems

The market maker provides purchase and sale prices for on- and off-exchange trading via an electronic trading system. If the availability of the relevant electronic trading system is restricted or even suspended, this will negatively affect the Securities' tradability.

1.5 No secondary market immediately prior to final maturity

The market maker and/or the exchange will cease trading in the Securities shortly before their scheduled Maturity Date. However, the values of the Securities may still change between the last trading day and the relevant final valuation date. This may be to the investor's disadvantage.

In addition, there is a risk that a barrier which is stipulated in the Terms and Conditions is reached, exceeded or breached in another way for the first time prior to final maturity after secondary trading has already ended.

1.6 Conflicts of interest

Conflicts of interest can arise in connection with the exercise of rights and/or obligations of the Issuer or any other party (e.g. an index sponsor or external advisor) in accordance with the Terms and Conditions (e.g., in connection with the determination or adaptation of parameters of the Terms and Conditions) which affect the attainments under the Securities.

The Issuer or another party, as well as any of its affiliates, may enter into transactions in the Securities' Underlying(s) for their own or their customers' account which might have a positive or negative effect on the performance of the Underlying(s) and may thus have a negative effect on the value of the Securities.

If the Underlying is a share, there is a possibility that the Issuer or another party, as well as any of its affiliates, may hold shares in the company that issued the Underlying.

The party that performs a specific function in respect of the Securities (e.g. that of index sponsor) might have to determine the calculation of the Underlying or calculate that value. This can lead to conflicts of interest if securities issued by that party can be chosen as Underlying.

In addition, the Issuer might issue additional derivative instruments linked to the Underlying(s). An introduction of these new competing products can adversely affect the value of the Securities.

In addition, the Issuer and its affiliates might now or in the future maintain a business relationship with the issuer of one or more Underlyings (including with regard to the issue of other securities relating to the relevant Underlying or lending, depositary, risk management, advisory and trading activities). Such business activities may be carried out as a service for customers or on an own account basis. The Issuer and/or any of its affiliates will pursue actions and take steps that it or they deem necessary or appropriate to protect its and/or their interests arising there from without regard to any negative consequences this may have for the Securities. Such actions and conflicts may include, without limitation, the exercise of voting rights, the purchase and sale of securities, financial advisory relationships and the exercise of creditor rights. The Issuer and any of its affiliates and their officers and directors may engage in any such activities without regard to the potential adverse effect that such activities may directly or indirectly have on any Securities.

The Issuer and any of its affiliates may, in connection with their other business activities, possess or acquire material (including non-public) information about the Underlying(s). The Issuer and any of its affiliates have no obligation to disclose such information about the Underlying(s).

The Issuer acts as market maker for the Securities and, in certain cases, the Underlying. In the context of such market making activities, the Issuer will substantially determine the price of the Securities and possibly that of the Underlying(s) and, thus, the value of the Securities. The prices

provided by the Issuer in its capacity as market maker will not always correspond to the prices that would have formed in the absence of such market making and in a liquid market.

1.7 Hedging risks

The Issuer and its affiliates may hedge themselves against the financial risks associated with the issue of the Securities by performing hedging activities in relation to the relevant Underlying(s). Such activities in relation to the Securities may influence the market price of the Underlying(s) to which the Securities relate. This will particularly be the case at the end of the term of the Securities. It cannot be ruled out that the termination and unwinding of hedging positions may have a negative influence on the value of the Securities or payments or deliveries to which the holder of the Securities is entitled.

In addition, investors may not be able to enter into hedging transactions that exclude or limit their risks in connection with the purchase of the Securities. The possibility to enter into such hedging transactions depends on market conditions and the terms and conditions of the respective Underlying.

1.8 Interest rate, inflationary and market risks, currency risks

The market for the Securities is influenced by the economic and market conditions, interest rates, exchange rates and inflation rates in Europe and other countries and regions. This influence may have negative consequences for the value of the Securities. Events in Europe and in other parts of the world can lead to higher market volatility and thus have an adverse effect on the value of the Securities. In addition, the economic situation and the market conditions can have negative consequences for the value of the Securities.

Currency risks for the purchaser arise in particular in those cases where (i) the Underlying is denominated in a different currency than the Securities, (ii) the Securities are denominated in a different currency than the official currency of the purchaser's home country or (iii) the Securities are denominated in a different currency than the currency in which the purchaser receives payments.

Exchange rates are subject to supply and demand factors on the international money markets, which are in turn influenced by macroeconomic factors, speculation and measures implemented by governments and central banks (e.g. foreign exchange controls and restrictions). The value of the Securities or the amount of the potentially due payment might be reduced because of exchange rate fluctuations.

Securities with a so-called "quanto element" (an in-built currency hedge that determines a fixed exchange rate at the time of issue) are not subject to a currency risk in relation to the settlement currency and the currency of the Underlying. During the term of the Securities, the economic value of the quanto hedge may fluctuate depending on various influencing factors.

As payments are made at the fixed exchange rate, the investor will not benefit from a positive development of the exchange rate at the time of maturity in the event of a currency hedge via the quanto element. In addition, when purchasing Securities with a quanto element, investors must assume that the purchase price of the Securities includes costs in respect of the quanto hedge.

1.9 Issue volume

The issue volume specified in the relevant Final Terms corresponds to the maximum total amount of Securities issued but is no indication of which volume of Securities will be actually issued. The actual volume depends on the market conditions and may change during the term of the Securities. Therefore, investors should note that the specified issue volume does not allow any conclusions as to the liquidity of the Securities in the secondary market.

1.10 Use of loans

If the investor finances the purchase of the Securities through a loan, he - in the event that he loses some or all of the invested capital - has not only to bear the loss incurred but will also have to pay the interest and repay the loan. In that case, the exposure to loss increases considerably. Investors should never assume that they will be able to repay the loan including interest out of the payments on

the Securities or - in the case of a sale of the Securities before maturity, as the case may be - out of the proceeds from such sale. The purchaser of Securities rather has to consider in advance on the basis of his financial situation whether he will still be able to pay the interest or repay the loan if the expected profits do not materialise or turn into losses.

1.11 Transaction costs

Transaction costs that are charged by the custodian bank and/or the exchange via which an investor places his purchase and/or selling order may reduce any profits and/or increase any losses. In the case of a loss in respect of a Security, the transaction costs will increase the loss incurred by the relevant investor.

1.12 Status of the Securities

The obligations under the Securities constitute direct, unconditional and unsecured (*nicht dinglich besichert*) obligations of the Issuer and, unless otherwise provided by applicable law, rank at least *pari passu* with all other unsubordinated and unsecured (*nicht dinglich besichert*) obligations of the Issuer. They are neither secured by the Deposit Protection Fund of the Association of German Banks (*Einlagensicherungsfonds des Bundesverbandes deutscher Banken e.V.*) nor by the German Deposit Guarantee and Investor Compensation Act (*Einlagensicherungs- und Anlegerentschädigungsgesetz*).

The Issuer may enter into hedging transactions in the relevant Underlying but is under no obligation to do so. If hedging transactions are entered into, they shall exclusively be to the benefit of the Issuer, and the investors shall have no entitlement whatsoever to the Underlying or with respect to the hedging transactions of the Issuer. Hedging transactions entered into by the Issuer shall not give rise to any legal relationship between the investors and the party responsible for the Underlying(s).

1.13 Impact of a downgrading of the credit rating

The value of the Securities is expected to be affected, in part, by the general appraisal of the Issuer's possibility to fulfil at any time and without restrictions its respective payment obligations. Such perceptions are generally influenced by the ratings given to the Issuer's outstanding securities by rating agencies such as Moody's Investors Services Inc., Fitch Ratings Ltd, a subsidiary of Fimalac, S.A., and Standard & Poor's Ratings Services, a division of The McGraw Hill Companies, Inc. Any downgrading of the Issuer's rating (if any) by even one of these rating agencies could result in a reduction in the value of the Securities.

1.14 Redemption only upon maturity; sale of the Securities

It is a feature of the Securities that, except in the case of a termination of the Securities by the Issuer (§ 8 of the respective Terms and Conditions), an automatic delivery of the cash payment to the holders of the Securities is foreseen only on the Maturity Date set out in the Terms and Conditions.

Prior to the Maturity Date, the economic value represented by the Securities may be realised only by way of a sale of the Securities. A sale of the Securities, however, is contingent upon the availability of market participants who are prepared to purchase the Securities at a corresponding price. If no such market participants are available, it may not be possible to realise the value of the Securities.

The Issuer has not assumed vis-à-vis the holders of the Securities any sort of commitment for the establishment of a market in the Securities or the buy back of the Securities.

1.15 General risks relating to the exercise of Warrants only

- Time delay following exercise

In the case of Warrants that provide for an exercise option (American Warrants), a time delay may occur between the point in time at which the investor opts to exercise the Warrants and/or the day on which the Warrants are exercised automatically and the point in time at which the Cash Amount in respect of such exercise is determined. Any such delay between the time of exercise and the time at which the Cash Amount is determined will be described in greater detail in the relevant Terms and Conditions. In particular at the occurrence of a Market Disruption

Event, however, such a delay may apply for much longer. The price of the relevant Underlying may fall significantly during that period, so that the Cash Amount may even be zero.

- Correct exercise and declaration obligation in respect of Warrants

In the case of Warrants that provide for an exercise option (American Warrants), the effectiveness of the exercise of the Warrants will depend upon the submission of an exercise declaration and the delivery of the Warrants to the Warrant Agent. Potential purchasers of Warrants should review the respective Final Terms, in particular the relevant Terms and Conditions set out therein, as to the exercise conditions that might have to be met with regard to their Warrants.

- Exercise restrictions in respect of Warrants

In the case of Warrants with shares as Underlying, the Terms and Conditions may provide that it may not be possible to exercise the option right on the day on which the ordinary shareholder meeting of the company having issued the shares decides upon the distribution of a dividend to its shareholders and possibly also on the exchange business day immediately preceding that day.

- Minimum exercise threshold in respect of Warrants

If the Terms and Conditions provide that a minimum exercise threshold applies in respect of the Warrants, then those holders that do not hold the requisite minimum number of Warrants will either be forced to sell their existing Warrants or to purchase additional Warrants; transaction costs will be incurred in either case.

1.16 Extraordinary termination, early redemption and adjustment rights

In accordance with the Terms and Conditions, the Issuer shall be entitled to perform adjustments with regard to the aforesaid Terms and Conditions or to terminate and redeem the Securities prematurely if certain conditions are met. These conditions are described in the relevant Terms and Conditions.

Such adjustment of the Terms and Conditions may have a negative effect on the value of the Securities as well as the Redemption Amount or the Cash Amount, as the case may be, and the Extraordinary Termination Amount to be paid to the holders of the Securities.

If the Securities are terminated, the amount payable to the holders of the Securities in the event of the termination of the Securities may be lower than the amount the holders of the Securities would have received without such termination. The amount payable may be lower than the purchase price paid by the holder of the Security or may even be zero, so that some or all of the invested capital may be lost. In addition, unwinding costs in connection with an early redemption will be deducted when determining the amount to be paid in the event of a termination in accordance with the Terms and Conditions. Such unwinding costs may comprise all costs, expenses (including loss of funding), tax and duties incurred by the Issuer in connection with the early redemption of the Securities and the related termination, settlement or re-establishment of any hedge or related trading position.

In addition, investors should note that the Issuer may exercise its termination right at a time, which is from the perspective of the holder of the Security unfavourable, because he expected an increase of the price of the Security at such point of time.

Finally, investors bear the risk that they may only be able to reinvest the amounts received upon early termination at a rate of return which is lower than the expected rate of return of the Securities that were early terminated.

1.17 Applicability of investment restrictions

Certain investors may be subject to legal investment restrictions.

The investment activities of certain investors are subject to investment laws and regulations, or review or regulation by certain authorities (this particularly applies to Structured Securities). Each potential

investor should consult his legal advisers to determine whether and to what extent (a) the purchase of Securities represents a legal investment for him, (b) Securities can be used as collateral for various types of financing and (c) other restrictions apply to his purchase or pledge of any Securities. Investors who are subject to official supervision should consult their legal advisers or the appropriate regulators to determine the appropriate treatment of Securities under any applicable risk-based capital or similar rules.

1.18 Taxes and other duties

All taxes or other duties payable at the level of the Issuer or the holders of the Securities on payments or deliveries made in relation to the Securities are to be borne by the holders of the Securities. The Issuer will not pay any additional amounts to the holders of the Securities on account of any such taxes or duties.

1.19 Financial Transaction Tax

On 14 February 2013, the European Commission published a proposal (the "**Commission's Proposal**") for a Directive for a common financial transactions tax (the "**FTT**") in Belgium, Germany, Estonia, Greece, Spain, France, Italy, Austria, Portugal, Slovenia and Slovakia (the "**Participating Member States**").

The Commission's Proposal has very broad scope and could, if introduced, apply to certain dealings in the Securities (including secondary market transactions) in certain circumstances. .

Under Commission's Proposal the FTT could apply in certain circumstances to persons both within and outside of the Participating Member States. Generally, it would apply to certain dealings in the Securities where at least one party is a financial institution, and at least one party is established in a Participating Member State. A financial institution may be, or be deemed to be, "established" in a Participating Member State in a broad range of circumstances, including (a) by transacting with a person established in a Participating Member State or (b) where the financial instrument which is subject to the dealings is issued in a Participating Member State.

However, the FTT proposal remains subject to negotiation between the Participating Member States and the scope of any such tax is uncertain. It may therefore be altered prior to any implementation, the timing of which remains unclear. Additional EU Member States may decide to participate.

Moreover, once the proposed Directive has been adopted (the "FTT Directive"), it will need to be implemented into the respective domestic laws of the Participating Member States and the domestic provisions implementing the FTT Directive might deviate from the FTT Directive itself. Finally, additional EU Member States may decide to participate. Prospective holders of the Securities should consult their own tax advisers in relation to the consequences of the FTT associated with subscribing for, purchasing, holding and disposing of the Securities.

1.20 U.S. Foreign Account Tax Compliance Withholding

Sections 1471 through 1474 of the U.S. Internal Revenue Code of 1986 ("**FATCA**") impose a new reporting regime and, potentially, a 30% withholding tax with respect to (i) certain payments from sources within the United States, (ii) "foreign passthru payments" made to certain non-U.S. financial institutions that do not comply with this new reporting regime, and (iii) payments to certain investors that do not provide identification information with respect to interests issued by a participating non-U.S. financial institution. Whilst the Securities are in global or dematerialised form and cleared through Clearstream Banking AG, Clearstream Banking S.A., Euroclear Bank S.A./N.V. and Euroclear UK & Ireland Limited (formerly CRESTCo Limited) (together, the "**Relevant Clearing Systems**") in all but the most remote circumstances, it is not expected that FATCA will affect the amount of any payment received by the Relevant Clearing System. However, FATCA may affect payments made to custodians or intermediaries in the subsequent payment chain leading to the ultimate investor if any such custodian or intermediary generally is unable to receive payments free of FATCA withholding. It also may affect payment to any ultimate investor that is a financial institution that is not entitled to receive payments free of withholding under FATCA, or an ultimate investor that fails to provide its broker (or other custodian or intermediary from which it receives payment) with any information, forms, other documentation or consents that may be necessary for the payments to be made free of FATCA

withholding. Investors should choose the custodians or intermediaries with care (to ensure each is compliant with FATCA or other laws or agreements related to FATCA) and provide each custodian or intermediary with any information, forms, other documentation or consents that may be necessary for such custodian or intermediary to make a payment free of FATCA withholding. Investors should consult their own tax adviser to obtain a more detailed explanation of FATCA and how FATCA may affect them. The Issuer's obligations under the Securities are discharged once it has made payment to, or to the order of, the Relevant Clearing System, and the Issuer therefore has no responsibility for any amount thereafter transmitted through the Relevant Clearing System and custodians or intermediaries. Further, foreign financial institutions in a jurisdiction, which has entered into an intergovernmental agreement with the United States (an **IGA**) are generally not expected to be required to withhold under FATCA or an IGA (or any law implementing an IGA) from payments they make.

1.21 U.S. Hiring Incentives to Restore Employment Act withholding may affect payments on the Certificates

The U.S. Hiring Incentives to Restore Employment Act imposes a 30% withholding tax on amounts attributable to U.S. source dividends that are paid or "deemed paid" under certain financial instruments if certain conditions are met. If an Issuer or any withholding agent determines that withholding is required, neither the Issuer nor any withholding agent will be required to pay any additional amounts with respect to amounts so withheld.

1.22 Risks in connection with the Act on the Recovery and Resolution of Institutions and Financial Groups, with the EU Regulation establishing a Single Resolution Mechanism, and with the proposal for a new EU regulation on the mandatory separation of certain banking activities

The Act on the Recovery and Resolution of Institutions and Financial Groups (*Gesetz zur Sanierung und Abwicklung von Instituten und Finanzgruppen – SAG*) – which is the transposition into German law of the EU framework for the recovery and resolution of credit institutions and investment firms (Directive 2014/59/EU, the "**Bank Recovery and Resolution Directive**" or "**BRRD**") may result, inter alia, in the terms of the Securities (e.g. their maturity) being varied, and claims for payment of principal, interest or other amounts under the Securities being subject to a conversion into one or more instruments that constitute common equity tier 1 capital for the Issuer, such as ordinary shares, or a permanent reduction, including to zero, by intervention of the competent resolution authority. Each of these measures is hereinafter referred to as a "**Regulatory Bail-in**". The holders of Securities would have no claim against the Issuer in such a case and there would be no obligation of Issuer to make payments under the Securities. This would occur if the Issuer becomes, or is deemed by the competent supervisory authority to have become, "non-viable" (as defined under the then applicable law) and unable to continue its regulated activities without such conversion or write-down or without a public sector injection of capital. The resolution authority will have to exercise its power in a way that results in (i) common equity tier 1 capital instruments (such as ordinary shares of the Issuer) being written down first in proportion to the relevant losses, (ii) thereafter, the principal amount of other capital instruments (additional tier 1 capital instruments and tier 2 capital instruments) being written down on a permanent basis or converted into common equity tier 1 capital instruments in accordance with their order of priority and (iii) thereafter, eligible liabilities – as those under the Securities – being converted into common equity tier 1 capital instruments or written down on a permanent basis in accordance with a set order of priority. The extent to which the Securities may be subject to a Regulatory Bail-in will depend on a number of factors that are outside the Issuer's control, and it will be difficult to predict when, if at all, a Regulatory Bail-in will occur. Potential investors should consider the risk that they may lose all of their investment, including the principal amount plus any accrued interest if a Regulatory Bail-in occurs. Financial public support will normally only be available as a last resort after having assessed and exploited, to the maximum extent practicable, the resolution tools, including the Regulatory Bail-in.

Further, the EU Regulation establishing a Single Resolution Mechanism ("**SRM**") contains provisions relating to resolution planning, early intervention, resolution actions and resolution instruments. The SRM applies to all banks supervised by the Single Supervisory Mechanism (SSM), and thus also to the Issuer. It mainly consists of a Single Resolution Board ('Board') and a Single Resolution Fund ('Fund'). This framework will ensure that, instead of national resolution authorities, there will be a

single authority – i.e. the Board – which will take all relevant decisions for banks being part of the Banking Union.

On 29 January 2014, the European Commission adopted a proposal for a new regulation following the recommendations released on 31 October 2012 by the High Level Expert Group (the "**Liikanen Group**") on the mandatory separation of certain banking activities. The proposed regulation contains new rules to stop the biggest and most complex banks from engaging in the activity of proprietary trading and would also give supervisors the power to require those banks to separate certain trading activities from their deposit-taking business if the pursuit of such activities compromises financial stability. Alongside this proposal, the Commission has adopted accompanying measures aimed at increasing transparency of certain transactions in the shadow banking sector. These rules are in many respects stricter than the requirements under the German bank separation law (sections 3(2)-(4), 25f, 64s of the German Banking Act (*Kreditwesengesetz* – KWG)).

The proposed regulation will apply to European banks that exceed the following thresholds for three consecutive years: a) total assets are equal or exceed €30 billion; b) total trading assets and liabilities are equal or exceed €70 billion or 10% of their total assets. The banks that meet the aforementioned conditions will be automatically banned from engaging in proprietary trading defined narrowly as activities with no hedging purposes or no connection with customer needs. In addition, such banks will be prohibited also from investing in or holding shares in hedge funds, or entities that engage in proprietary trading or sponsor hedge funds. Other trading and investment banking activities - including market-making, lending to venture capital and private equity funds, investment and sponsorship of complex securitisation, sales and trading of derivatives – are not subject to the ban, however they might be subject to separation. The proprietary trading ban would apply as of 1 January 2017 and the effective separation of other trading activities would apply as of 1 July 2018. Should a mandatory separation be imposed, additional costs are not ruled out, in terms of higher funding costs, additional capital requirements and operational costs due to the separation, lack of diversification benefits.

1.23 Substitution of the Issuer

The Issuer is entitled at any time, without the consent of the holders of the Securities, to appoint another company as the new Issuer with regard to all obligations arising out of or in connection with the Securities in its place if certain conditions are met. In that case, the holder of the Securities will generally also assume the insolvency risk with regard to the new Issuer.

1.24 Governing Law

The Terms and Conditions will be governed by, and construed in accordance with German law, with the constituting of the Securities being governed by the law of the jurisdiction as set out in the respective Final Terms in the case of dematerialised Securities. No assurance can be given as to the impact of any possible judicial decision or change in the relevant law(s) or any administrative practice after the date of this Information Memorandum.

1.25 Change of law

The Terms and Conditions contained in this Information Memorandum are based on relevant laws, judicial decisions and administrative practices in effect as at the date of this Information Memorandum. No assurance can be given as to the impact of any possible amendments of the relevant laws, new judicial decisions or change to such administrative practices after the date of this Information Memorandum. The investor should note that the Issuer might be entitled to extraordinarily terminate and redeem the Securities if certain conditions are met.

1.26 Disruption event

The Issuer is entitled to determine disruption events (i.e. market disruption events) that might result in a postponement of a calculation and/or of any payments or deliveries under the Securities and that might affect the value of the Securities.

In addition, in certain cases, the Issuer (especially if a market disruption event lasts several days) may estimate certain prices that are relevant with regard to payments or the reaching of thresholds. These estimates may deviate from their actual value.

1.27 No claim against the issuer of an Underlying

Securities relating to one or more Underlying(s) do not give rise to any payment or other claims towards the issuer(s) of the Underlying(s) to which those Securities relate. If the payments by the Issuer are less than the purchase price paid by the holder of the Securities, such holder will not have recourse to the issuer(s) of the Underlying(s).

1.28 Securities that are denominated in foreign currencies

If the Securities are listed or traded in a currency other than the currency of issue (foreign currency) or if payment is made in a foreign currency, the investor will be exposed to exchange rate risks that may have an adverse effect on the Securities' yield. Exchange rate fluctuations have various causes, such as macroeconomic factors, speculative transactions and interventions by central banks and governments.

A change in the exchange rate of a currency in relation to the Euro, for instance, will result in a corresponding change in the Euro value of Securities that are not denominated in Euro, as well as in a corresponding change in the Euro value of payments that, pursuant to the Terms and Conditions of the relevant Securities, are not made in Euro. The same applies where the Redemption Amount or the Cash Amount, as the case may be, or any other payment of a Security must be converted into Euro because it is determined on the basis of an Underlying that is not expressed in Euro (e.g., where interests or the Redemption Amount or the Cash Amount, as the case may be, are calculated based on the difference, converted into Euro, between an Underlying expressed in U.S.\$ and the market price of a share denominated in U.S.\$).

If the value of a currency in which the Redemption Amount or the Cash Amount, as the case may be, or any other payment of a Security is payable or in which the Underlying of a Security is expressed falls in relation to the Euro and the value of the Euro increases accordingly, the Euro value of the relevant Security and/or the value of the payments in connection with the Security converted into Euro will fall.

2. RISKS RESULTING FROM THE STRUCTURE OF THE SECURITIES

2.1 Conventional Fixed Rate Notes, Floating Rate Notes, Dual Currency Notes as well as Zero Coupon Notes

Fixed Rate Notes

A change in interest rates in the financial market after the issue of a Fixed Rate Note has a reverse impact on the price of the Fixed Rate Note: if the interest rates in the financial market increase, the price of a Fixed Rate Note will normally decrease until its yield has more or less reached the market interest rates. In the case of decreasing market interest rates the price of a Fixed Rate Note will increase until its yield has approximately reached the market interest rate.

The reason for this is that Fixed Rate Notes have an interest rate equal to a fixed percentage of the denomination. In the case of increasing interest rates this fixed percentage may, in comparison, lose its appeal to investors so that Fixed Rate Notes are sold in the secondary market. The price of an already existing Fixed Rate Note may therefore fall below par. In the case of decreasing interest rates in the financial market, the opposite will happen in general: the interest paid for Fixed Rate Notes will, in comparison, become more attractive to investors which will lead to an increase in the price of the Fixed Rate Notes.

The changes in the price will become relevant to the investor once he wants to sell the Fixed Rate Notes prior to maturity or if the Fixed Rate Notes are early redeemed prior to maturity (e.g., in the case of a termination by the Issuer). In the case of an early redemption or termination the Terms and

Conditions may provide for an amount payable to the investor equal to the fair market value of the Notes. In the case of a decrease in the price of the Fixed Rate Note, this amount may be below par and/or below the price the investor paid when purchasing the Notes.

Floating Rate Notes

A key difference between Floating Rate Notes and Fixed Rate Notes is that interest income on Floating Rate Notes cannot be anticipated. Due to varying interest income, investors are not able to determine a definite yield of Floating Rate Notes at the time of purchase, so that their return on investment cannot be compared with that of investments having fixed interest rates.

Reverse Floating Rate Notes

The interest income of Reverse Floating Rate Notes is calculated in reverse proportion to the reference interest rate: if the reference interest rate increases, interest income decreases whereas it increases if the reference interest rate decreases.

Unlike the price of ordinary Floating Rate Notes, the price of Reverse Floating Rate Notes is highly dependent on the yield of Fixed Rate Notes having the same maturity. Price fluctuations of Reverse Floating Rate Notes are parallel to but substantially stronger than those of Fixed Rate Notes having a similar maturity.

The value of Reverse Floating Rate notes especially may decrease if short and long term market interest rates both increase. The same effect applies to a certain extent if long-term market interest rates increase and short-term market interest rates decrease.

Capped Floating Rate Notes

The maximum amount of interest payable in respect of Capped Floating Rate Notes that bear or pay interest with a capped variable rate will equal the sum of the reference rate and any specified margin subject to a specified maximum rate. Consequently, investors in these securities will not benefit from any increase in the relevant reference interest rate if, when added to the specified margin, such resulting interest rate is equal to or greater than the maximum specified interest rate.

The market value of Capped Floating Rate Notes would typically decrease if market interest rates increase, especially the closer the sum of the relevant reference interest rate and any margin is to the maximum specified interest rate or if such sum exceeds the maximum specified rate. The yield of securities with a capped variable rate may be considerably lower than a yield of similar securities without a cap.

Dual Currency Notes

If the Notes are Dual Currency Notes, the holders of the Notes are exposed to a foreign currency risk that might adversely affect the yield of the Notes. Changes in exchange rates may result from various factors such as macro-economic factors, speculative transactions and interventions by central banks and governments.

A change in the exchange rate of a currency against the Euro, for example, will result in a corresponding change in the Euro value of payments made in a currency other than in Euro in accordance with the relevant Terms and Conditions.

If the value of a currency in which the interest and/or the Redemption Amount of a Dual Currency Note is payable falls in relation to the Euro and the value of the Euro rises accordingly, the Euro value of the relevant Notes or the value of the payments under the relevant Notes converted into Euros will fall.

Zero Coupon Notes

Changes in market interest rates have a substantially stronger impact on the prices of Zero Coupon Notes than on the prices of ordinary Notes because the discounted issue prices are substantially below par and these Notes do not pay any periodic interest during their term. If market interest rates

increase, Zero Coupon Notes can suffer higher price losses than other Notes having the same maturity and a comparable credit rating. Due to their leverage effect, Zero Coupon Notes are a type of investment associated with a particularly high price risk.

Notes issued at a substantial discount or premium

The market values of Notes issued at a substantial discount or premium from their principal amount tend to fluctuate more in relation to general changes in interest rates than do prices for conventional interest-bearing securities. Generally, the longer the remaining term of the Notes, the greater the price volatility as compared to conventional interest-bearing Notes with comparable maturities.

2.2 Risks resulting from the type of Warrants under the Programme

Warrants (plain vanilla)

Warrants will grant the investor the right to receive the payment of a Cash Amount: The Cash Amount shall be equal to (i) the amount by which the Reference Price of the Underlying (share, index, futures contract, currency exchange rate or fund) on the Valuation Date exceeds (in the case of Call Warrants) or is exceeded by (in the case of Put Warrants) the Strike set out in the Terms and Conditions multiplied by (ii) the Ratio, whereby the result of such calculation shall be converted into [Euro][●], if necessary. [For the purposes of these calculations, one [index point][percentage point] shall be equal to [Euro][●] 1.00.] Whether the holder of the Warrants is entitled to a relevant payment will to a significant extent depend upon the performance of the Underlying during the term of the Warrants.

The value of the Warrant in the secondary market will normally undergo a corresponding development: a call warrant will normally (i.e. by leaving out of account any other factors relevant for the formation of Warrant prices) lose value if the price of its Underlying falls. Conversely, the value of a put warrant will fall if the price of its Underlying rises. [Capped:] [The Cash Amount, however, is limited (capped). This means that an increase of the price of the Underlying beyond the Cap (in case of Call Warrants) or below the Cap (in case of Put Warrants) will not result in an increase of the Cash Amount. In this case the investor will receive a fixed Maximum Amount set out in the Terms and Conditions.]

"**American warrants**" are Warrants that can be exercised during the Exercise Period. If they are not exercised during the Exercise Period – as provided for in the relevant Terms and Conditions – the Warrants will be deemed automatically exercised on the last day of the Exercise Period, provided that the Cash Amount is a positive amount (Automatic Exercise).

"**European warrants**" are Warrants that will be deemed automatically exercised on the Exercise Date, provided that the Cash Amount is positive (Automatic Exercise). It is not possible to exercise these Warrants prior to the Exercise Date.

The right to receive the Underlying itself instead of the Cash Amount is excluded.

Warrants are particularly risky investment instruments that entail the risk of a complete loss of the purchase price paid for the Warrants (**total loss**). This will specifically be the case if the Reference Price of the Underlying does not exceed (in the case of Call Warrants) or is not below (in the case of Put Warrants) the Strike and, in view of the remaining term of the Warrants, it can no longer be expected that the Reference Price of the Underlying will move in the desired direction once more in time before the expiry of the Warrants. It must be noted that a change in the price of the Warrants' Underlying, or even the non-materialisation of an expected change therein, may result in a disproportionate change in the value of the Warrant and may even render them worthless. [Capped:] [As the Cash Amount is capped, under no circumstances the investor will receive a payment which exceeds the Maximum Amount.]

In addition, any economic considerations regarding an investment in the Warrants must also take into account the costs associated with their purchase or sale.

The Issuer may be entitled to perform adjustments in accordance with the Terms and Conditions. Such adjustments may have an adverse effect on the value of the Warrants.

Power Warrants

Power Warrants will grant the investor the right to receive the payment of a Cash Amount. The Cash Amount shall be equal to (i) the squared amount by which the Reference Price of the Underlying (e.g. currency exchange rate) on the Valuation Date exceeds (in the case of Call Warrants) or is exceeded by (in the case of Put Warrants) the Strike set out in the Terms and Conditions multiplied by (ii) the Ratio, whereby the result of such calculation shall be converted into [Euro][•], if necessary. [For the purposes of these calculations, one [index point][percentage point] shall be equal to [Euro][•] 1.00.] The Cash Amount is capped, however, so that a price development beyond the Cap (in case of Call Warrants) or below the Cap (in case of Put Warrants) will not result in an increase in the Cash Amount. In this case the investor will receive a fixed Maximum Amount set out in the Terms and Conditions

The right to receive the Underlying itself instead of the Cash Amount is excluded.

Power Warrants, like all warrants, are particularly risky securities that entail the potential complete loss of the purchase price paid for them (**total loss**).

It must be taken into account with regard to Power Warrants that squaring the difference between the Strike and the Reference Price will not always result in an increase of the payable amount. For instance, no such amount will be due if, in the case of Power Warrants relating to an exchange rate, the difference multiplied by one hundred that is to be squared corresponds to less than U.S.\$ 1.00 and is therefore expressed as a decimal fraction (e.g. U.S.\$ 0.50). When squaring a decimal fraction, the result will be lower than the initial value (e.g. $0.50 \times 0.50 = 0.25$). This means that the exercise of Power Warrants will result in lower Cash Amounts than that of traditional warrants where the difference between the Strike and the Reference Price, multiplied by one hundred, is less than U.S.\$ 1.00.

It must be noted that a change in the price of the Warrant's Underlying, or even the non-materialisation of an expected price change therein, may have a disproportionate effect on the Warrants' value and may even render them worthless. This will apply in particular if the difference between the Strike and the Reference Price is significant, but the price at which the maximum amount would have to be paid has not been reached. In that range, any price change will result in a significant change in the Cash Amount as a result of the squaring process and thus also in a drastic increase or reduction in the value of the Warrants. If, for instance, in the case of an exchange rate of U.S.\$ 1.065 for each Euro 1.00, the squared one-hundred-fold difference corresponds to U.S.\$ 2.25 (Strike U.S.\$ 1.050) and the exchange rate goes up to U.S.\$ 1.070, the amount to be converted into Euro will rise to U.S.\$ 4.00, resulting in a difference of merely U.S.\$ 1.75. If, however, the sample exchange rate is U.S.\$ 1.080 and equally rises by U.S.\$ 0.005, the amount to be converted into Euro will rise from U.S.\$ 9.00 to U.S.\$ 12.25, resulting in a difference of U.S.\$ 3.25. As a result of this squaring effect, the price of Power Warrants is especially volatile in certain ranges. In addition, in light of the limited term of the Warrants, there is no certainty that the price of the Warrants will recover in time before the expiry of the Warrants.

As the Cash Amount is capped the investor will never receive a payment which exceeds the Maximum Amount.

In addition, any economic considerations regarding an investment in the Warrants must also take into account the costs associated with their purchase or sale.

The Issuer may be entitled to perform adjustments in accordance with the Terms and Conditions. Such adjustments may have an adverse effect on the value of the Warrants.

Bonus Warrants

[Classic:] Bonus Warrants will grant the investor the right to receive the payment of a Cash Amount. The Cash Amount will be either equal to (i) the Bonus Amount or (ii) the product of the Reference Price of the Underlying (e.g. a share, an index) on the Valuation Date and the Ratio, whereby the result of such calculation shall be converted into [Euro][•], if necessary, all as specified in the Terms and Conditions. [For the purposes of these calculations, one [index point][percentage point] shall be equal to [Euro][•] 1.00.]

The investor shall receive the Bonus Amount as set out in the Terms and Conditions, if

- a) during the Reference Period the price of the Underlying has never been equal to or below the Barrier **and**.
- b) the Reference Price of the Underlying on the Valuation Date is equal to or below the Bonus Barrier]

[Capped:] Capped Bonus Warrants will grant the investor the right to receive the payment of a Cash Amount determined in accordance with the following provisions, all as specified in the Terms and Conditions.

- a) If during the Reference Period the price of the Underlying (e.g. a share, an index) has never been equal to or below the Barrier, the Cash Amount shall be equal to the Bonus Amount.
- b) If during the Reference Period the price of the Underlying has at least once been equal to or below the Barrier **and**
 - if the Reference Price of the Underlying on the Valuation Date is below the Cap, the Cash Amount shall be equal to the product of (i) the Reference Price of the Underlying on the Valuation Date and (ii) the Ratio, whereby the result of such calculation shall be converted into [Euro][•], if necessary, all as specified in the Terms and Conditions[. For the purposes of these calculations, one [index point][percentage point] shall be equal to [Euro][•] 1.00.]; or
 - if the Reference Price of the Underlying on the Valuation Date is equal to or above the Cap, the Cash Amount shall be equal to the Maximum Amount.]

The right to receive the Underlying itself instead of the Cash Amount is excluded.

[Capped:] Under no circumstances will the investor receive a Cash Amount which exceeds the Maximum Amount.]

Bonus Warrants, like all warrants, are particularly risky securities that entail the potential complete loss of the purchase price paid for them (**total loss**). Prospective purchasers should also note that the risk profile of a Bonus Warrant differs from that of a traditional call or put warrant. The holder of the Warrants could suffer significant losses with respect to the purchase price paid. **This is particularly the case if the price of the Underlying during the Reference Period is at least once equal to or below the Barrier.** In exceptionally adverse conditions this may lead to a **total loss** of invested capital.

In addition, any economic considerations regarding an investment in the Warrants must also take into account the costs associated with their purchase or sale.

The Issuer may be entitled to perform adjustments in accordance with the Terms and Conditions. Such adjustments may have an adverse effect on the value of the Warrants.

In order to assess the extent to which the price of the Underlying, at any time during the Reference Period, is at least once equal to or below the Barrier, all determined and published prices of the

Underlying shall be used, while regarding the question whether the price of the Underlying on the Valuation Date is equal to or below the Bonus Barrier [*Capped*][and is equal to or above the Cap], only the Reference Price of the Underlying on the Valuation Date as defined in the Terms and Conditions shall be relevant.

Bottom-up-/Top-down Warrants

Bottom-up/Top-down Warrants, at the end of their term, will grant the investor the right to receive the payment of a Cash Amount, which is calculated as the sum of an amount for each Valuation Date on which the Reference Price of the Underlying (e.g. a share, an index), during a Reference Period, is equal to or above the Lower Barrier (in the case of Bottom-up Warrants) or equal to or below the Upper Barrier (in the case of Top-down Warrants) set out in the Terms and Conditions.

The right to receive the Underlying itself instead of the Cash Amount is excluded.

Bottom-up / Top-down Warrants, like all warrants, are particularly risky securities that entail the potential complete loss of the purchase price paid for them (**total loss**). Prospective purchasers should also note that the risk profile of a Bottom-up / Top-down Warrant differs from that of a traditional call or put warrant. Bottom-up / Top-down Warrants entail the risk that the Reference Price of the relevant Underlying may never or only on a few days during the Reference Period be above the applicable Lower Barrier or below the applicable Upper Barrier. **In that case, the holder of the Warrant will receive no or only a small payment.**

In addition, any economic considerations regarding an investment in the Warrants must also take into account the costs associated with their purchase or sale.

The Issuer may be entitled to perform adjustments in accordance with the Terms and Conditions. Such adjustments may have an adverse effect on the value of the Warrants.

[•]

Corridor Warrants

Corridor Warrants, at the end of their term, will grant the investor the right to receive the payment of a Cash Amount, which is calculated as the sum of an amount for each Valuation Date on which the Reference Price of the Underlying (e.g. a share, an index), during a Reference Period, is within a Corridor set out in the Terms and Conditions.

The right to receive the Underlying itself instead of the Cash Amount is excluded.

Corridor Warrants, like all warrants, are particularly risky securities that entail the potential complete loss of the purchase price paid for them (**total loss**). Prospective purchasers should also note that the risk profile of a Corridor Warrant differs from that of a traditional call or put warrant. Corridor Warrants entail the risk that the Reference Price of the relevant Underlying may permanently or often be outside the applicable Corridor. **In that case, the holder of the Warrant will receive no or only a small payment.**

In addition, any economic considerations regarding an investment in the Warrants must also take into account the costs associated with their purchase or sale.

The Issuer may be entitled to perform adjustments in accordance with the Terms and Conditions. Such adjustments may have an adverse effect on the value of the Warrants.

[*Other product-specific risk factors:*]

[•]

Hit Warrants

Hit Warrants will grant the investor the right to receive the payment of a fixed amount that will be paid as soon as the price of the Underlying (e.g. currency exchange rate), on a day within the Reference Period, is equal to or above (in the case of Call Warrants) or equal to or below (in the case of Put Warrants) the Hit-Barrier set out in the Terms and Conditions. If, however, the price of the Underlying fails to reach the Hit-Barrier or be above it (in the case of Call Warrants) or be below it (in the case of Put Warrants) during the Reference Period, the fixed amount will not be paid.

The right to receive the Underlying itself instead of the Cash Amount is excluded.

Hit Warrants, like all warrants, are particularly risky securities that entail the potential complete loss of the purchase price paid for them (**total loss**). It must be noted that a change in the price of the Warrants' Underlying, or even the non-materialisation of an expected change therein, may disproportionately affect the value of the Warrants or even render them worthless. In light of the Warrants' limited term, there is no certainty that the price of the Warrants will recover in time before their expiry.

Prospective purchasers should also note that the risk profile of a Hit Warrant differs from that of a traditional call or put warrant. Hit Warrants entail the risk that the price of the relevant Underlying may never reach the Hit Barrier during the Reference Period. **In that case, the holder of the Warrant will receive no payment.**

In addition, any economic considerations regarding an investment in the Hit Warrants must also take into account the costs associated with their purchase or sale.

[with reference to a Currency Exchange Rate:]

Investors should note, that the Reference Period expires on the Exercise Date already at such point in time, at which the European Central Bank publishes the official Euro foreign exchange reference rate in [U.S.\$][●] on Reuters screen page ECB37 as "ECB Reference Rate". If any rate of the Underlying reaches the Hit-Barrier only after such point in time and not before, no Cash Amount will be paid.]

The Issuer may be entitled to perform adjustments in accordance with the Terms and Conditions. Such adjustments may have an adverse effect on the value of the Warrants.

[Other product-specific risk factors:]

[●]

Inline Warrants

Inline Warrants will grant the investor the right to receive the payment of a fixed amount that will be paid if the price of the Underlying (e.g. index, currency exchange rate), during a Reference Period, is within a certain price range (Range) set out in the Terms and Conditions. If, however, the price of the Underlying reaches or exceeds the Upper Barrier or reaches or falls below the Lower Barrier ("**Knock-out Event**"), [the Cash Amount will be equal to 1/10 of a eurocent per Warrant][the Inline Warrants will expiry worthless][*insert other provision*].

The right to receive the Underlying itself instead of the Cash Amount is excluded.

Inline Warrants, like all warrants, are particularly risky securities that entail the potential complete loss of the purchase price paid for them (**total loss**). It must be noted that a change in the price of the Warrants' Underlying, or even the non-materialisation of an expected change therein, may disproportionately affect the value of the Warrants or even render them worthless. In light of the Warrants' limited term, there is no certainty that the price of the Warrants will recover in time before their expiry.

Prospective purchasers should also note that the risk profile of an Inline Warrant differs from that of a traditional call or put warrant. It is a particular characteristic of Inline Warrants that the Warrant will be

expired [worthless] once the price of the Underlying has reached or exceeded the Upper Barrier or reached or fallen below the Lower Barrier. [Under these circumstances, unlike with other types of Warrant, it is impossible that the price of the Inline Warrants will recover.][**In that case, the holder of the Warrant will receive no payment.**]

In addition, any economic considerations regarding an investment in the Warrants must also take into account the costs associated with their purchase or sale.

The Issuer may be entitled to perform adjustments in accordance with the Terms and Conditions. Such adjustments may have an adverse effect on the value of the Warrants.

Down & Out Warrants

Down & Out Warrants will grant the investor to the right to receive the payment of a Cash Amount. The Cash Amount shall be equal to the product of (i) the amount expressed in [Euro][•] by which the Reference price of the Underlying (e.g. a share, an index) on the Valuation Date is exceeded by the Strike and (ii) the Ratio, whereby the result of such calculation shall be converted into [Euro][•], if necessary. [For the purposes of these calculations, one [index point][percentage point] shall be equal to [Euro][•] 1.00.] If the price of the Underlying reaches or falls below the Barrier set out in the Terms and Conditions during the Reference Period ("**Knock-out Event**"), [the Cash Amount will be equal to 1/10 of a eurocent per Warrant][the Down & Out Warrants will expire worthless][*insert other provision*].

The right to receive the Underlying itself instead of the Cash Amount is excluded.

Down & Out Warrants, like all warrants, are particularly risky securities that entail the potential complete loss of the purchase price paid for them (**total loss**). It must be noted that a change in the price of the Warrants' Underlying, or even the non-materialisation of an expected change therein, may disproportionately affect the value of the Warrants or even render them worthless. In light of the Warrants' limited term, there is no certainty that the price of the Warrants will recover in time before their expiry.

Prospective purchasers should also note that the risk profile of a Down & Out Warrant differs from that of a traditional call or put warrant. It is a particular characteristic of Down & Out Warrants that the Warrant will expire [worthless] once the price of the Underlying has fallen below the relevant Barrier. [Under these circumstances, unlike with other types of Warrant, it is impossible that the price of the Down & Out Warrants will recover.][**In that case, the holder of the Warrant will receive no payment.**]

In addition, any economic considerations regarding an investment in the Warrants must also take into account the costs associated with their purchase or sale.

The Issuer may be entitled to perform adjustments in accordance with the Terms and Conditions. Such adjustments may have an adverse effect on the value of the Warrants.

Warrants issued as underlyings for EIS Notes

Warrants issued as underlyings for EIS Notes will grant the investor the right to receive the payment of a Cash Amount either at an Early Settlement Date or on the Final Settlement Date: The Cash Amount shall be equal to (i) an amount as specified in the relevant Final Terms that is equal to or above the Issue Price per Warrant in case the Warrants are redeemed on an Early Settlement Date or, if redeemed on the Final Settlement Date, there is a positive or sideways performance of the Underlying(s) as determined during the term of the Warrants or (ii) an amount below the Issue Price or

even equal to zero if there is a negative performance of the Underlying(s) as determined during the term of the Warrants..

The value of the Warrant in the secondary market will normally (i.e. by leaving out of account any other factors relevant for the formation of Warrant prices) lose value if the price of its Underlying falls. **[Capped:]** The Cash Amount, however, is limited (capped). This means that an increase of the price of the Underlying beyond the Cap will not result in an increase of the Cash Amount. In this case the investor will receive a fixed Maximum Amount set out in the Terms and Conditions.]

The right to receive the Underlying itself instead of the Cash Amount is excluded.

Warrants are particularly risky investment instruments that entail the risk of a complete loss of the purchase price paid for the Warrants (**total loss**). This will specifically be the case if the Warrants are not redeemed on an Early Settlement Date or the Reference Price of the Underlying(s) on the Final Exercise Date does not exceed the Strike Price and, in view of the remaining term of the Warrants, it can no longer be expected that the Reference Price of the Underlying will move in the desired direction once more in time before the expiry of the Warrants. It must be noted that a change in the price of the Warrants' Underlying(s), or even the non-materialisation of an expected change therein, may result in a disproportionate change in the value of the Warrant and may even render them worthless. **[Capped:]** As the Cash Amount is capped, under no circumstances the investor will receive a payment which exceeds the Maximum Amount.]

In addition, any economic considerations regarding an investment in the Warrants must also take into account the costs associated with their purchase or sale.

The Issuer may be entitled to perform adjustments in accordance with the Terms and Conditions. Such adjustments may have an adverse effect on the value of the Warrants.

[Other product-specific risk factors:]

[•]

2.3 Early Redemption of the Securities exercised by the Issuer, Automatic Early Redemption

The Terms and Conditions of the Securities may provide for early redemption rights of the Issuer or automatic early redemption. Any such early redemption provisions may affect the market value of the Securities. Before or during any period during which the Issuer may decide to redeem the Securities, or in which an event triggering automatic early redemption may occur, the market value of the Securities will normally not rise to a level that is significantly above the Redemption Amount or the Cash Amount, as the case may be. An early redemption of the Securities may result in the expected yield in connection with the investment in the Securities not being reached. In addition, the amount received by the holder of the Security upon early termination may be lower than the purchase price paid by the holder of the Security or may even be zero, so that some or all of the invested capital may be lost.

In that case, the holders of the Securities may be able to invest the amounts received by them in the case of early redemption only in return for a yield that is below the (expected) yield of the Securities that were redeemed early.

2.4 Ordinary Termination by the Issuer in case of unlimited Certificates or unlimited Warrants

Investors should note that the Issuer, despite the Certificates or Warrants being referred to as "Unlimited", is entitled to ordinarily terminate the Certificates or Warrants with effect as of an Ordinary Termination Day. That means that the Issuer is able to limit the term of the Certificates or Warrants, which is initially indefinite, and may exercise its termination right at a time that might be unfavourable from the investor's point of view because the investor expects a further price increase in relation to the Underlying of the Securities at that time.

2.5 Exercise requirement (Bermudan exercise) and sale with respect to unlimited Certificates or unlimited Warrants

It is a feature of the unlimited Certificates or the unlimited Warrants that, except in the case of a knock-out event, if applicable, no automatic payment of the Redemption Amount or the Cash Amount, as the case may be, represented by the unlimited Certificates or the unlimited Warrants is scheduled at any time during the term of the unlimited Certificates or the unlimited Warrants. Any payment of the Redemption Amount or the Cash Amount, as the case may be, is contingent upon the relevant unlimited Certificate or the relevant unlimited Warrant either having been exercised previously by the holder of such unlimited Certificate or such unlimited Warrant in accordance with the terms and conditions or having been terminated by the Issuer by virtue of an ordinary or extraordinary termination notice. In the absence of such exercise or termination, there can be no guarantee that the investor will receive the Redemption Amount or the Cash Amount, as the case may be, represented by the unlimited Certificates or the unlimited Warrants. Since it is uncertain whether the Issuer will terminate the unlimited Certificates or the unlimited Warrants, the holder of the unlimited Certificate or the unlimited Warrant will be forced to voluntarily exercise the unlimited Certificates or the unlimited Warrants in accordance with the terms and conditions if he intends to receive the Redemption Amount or the Cash Amount, as the case may be, represented by the unlimited Certificates or the unlimited Warrants.

The holders of the unlimited Certificate or the unlimited Warrant should note that exercise of the unlimited Certificates or the unlimited Warrants is possible only with effect as of the dates stated in the applicable Final Terms (Bermudan exercise). In between these dates, the economic value represented by the unlimited Certificates or the unlimited Warrants (or part thereof) can be realised solely by virtue of a sale of the unlimited Certificates or the unlimited Warrants.

The effectiveness of such exercise of the unlimited Certificates or the unlimited Warrants will depend upon the submission of a exercise notice and the delivery of the unlimited Certificates or the unlimited Warrants to the Paying Agent. Potential purchasers of unlimited Certificates or unlimited Warrants should review the respective terms and conditions as to the applicable requirements with respect to the exercise of their unlimited Certificates or their unlimited Warrants.

If the terms and conditions provide that a minimum exercise threshold applies in respect of the unlimited Certificates or the unlimited Warrants, then those holders that do not hold the requisite minimum number of unlimited Certificates or unlimited Warrants will either be forced to sell their existing unlimited Certificates or unlimited Warrants or to purchase additional unlimited Certificates or unlimited Warrants; transaction costs will be incurred in either case.

However, a time delay may occur between the point in time at which the holder of the unlimited Certificate or the unlimited Warrant opts to exercise its unlimited Certificates or its unlimited Warrants and the point in time at which the Redemption Amount or the Cash Amount, as the case may be, in respect of such exercise is determined. Any such delay between the time of exercise and the time at which the Redemption Amount or the Cash Amount, as the case may be, is determined will be described in greater detail in the relevant terms and conditions. In particular in the event of a disruption event (e.g. market disruption events), however, such a delay may apply for much longer. The price of the relevant Underlying may fall significantly during that period, so that the Redemption Amount or the Cash Amount, as the case may be, may even be zero.

The economic value represented by the unlimited Certificates or the unlimited Warrants (or part thereof) can also be realised by virtue of a sale of the unlimited Certificates or the unlimited Warrants. A sale of the unlimited Certificates or the unlimited Warrants, however, will be dependent upon the availability of market participants who are prepared to purchase the unlimited Certificates or the unlimited Warrants at a corresponding price. If no such market participants can be found, it may be impossible to realise the value of the unlimited Certificates or the unlimited Warrants. The Issuer is under no obligation whatsoever towards the holders of the unlimited Certificate or the unlimited Warrant to ensure that trading in the unlimited Certificates or the unlimited Warrants takes place and/or to repurchase the unlimited Certificates or the unlimited Warrants.

2.6 Dependency of the Redemption Amount or the Cash Amount, as the case may be, of the Securities on the performance of the Underlying(s)

It should be noted that in case of a continuing loss in the price of an Underlying of the Securities, the probability increases that the Securities will be redeemed at an amount which will be less than the purchase price paid for the Securities. The investor should be aware that the Redemption Amount or the Cash Amount, as the case may be, will not only depend on a reference price or performance of a specific Underlying or basket at maturity but also on the performance of such Underlying or basket during the lifetime of the Securities or on specific dates. Due to the limited maturity of the Securities, the holder of the Security should not rely on any recovery of the price of an Underlying in time before the relevant valuation date. This means that the Securities will possibly be redeemed at an amount which is less than the purchase price paid. As a result, the holder of the Security could suffer a significant or total loss with respect to the purchase price paid.

2.7 Worst Performing Underlying

Potential investors in Securities relating to the positive performance of more than one Underlying should consider that in accordance with the Terms and Conditions the calculation of the Redemption Amount or the Cash Amount, as the case may be, per Security may solely be based on the performance of the Worst Performing Underlying and, consequently, on the Underlying with the lowest performance.

Consequently, potential investors should be aware that compared to securities, which refer to one Underlying only, Securities relating to the performance of more than one Underlying show a higher exposure to loss. This risk may not be reduced by a positive performance of the remaining Underlying(s), because the remaining Underlying(s) is/are not taken into account when calculating the Redemption Amount or the Cash Amount, as the case may be.

2.8 Basket of Underlyings

Potential investors in Securities relating to the performance of a basket of Underlyings should be aware that compared to securities which refer to a single Underlying only, Securities relating to the performance of a basket of Underlyings give exposure to additional factors. In case of a basket, the value of the Securities depends on the performance of all Underlyings constituting the basket by calculating the Basket Performance either as the arithmetic mean of the performances of all Underlyings or as the weighted average of the performances of all Underlyings or as the sum of the performances of all Underlyings (multi performance). Such Basket Performance is taken into account when calculating the Redemption Amount or the Cash Amount, as the case may be, and, therefore, the decrease in the value of one Underlying over the term of the Securities will have a negative effect on the Basket Performance which will lead to a reduced Redemption Amount or the Cash Amount, as the case may be.

Moreover, potential investors should be aware that compared to Securities which refer to a basket where the Basket Performance is calculated as either the arithmetic mean of the performances of all Underlyings or as the weighted average of the performances of all Underlyings, Securities which refer to a basket calculated as the sum of the performances of all Underlyings (multi performance) show a higher exposure to loss. Due to such calculation, a decrease in the value of one Underlying over the term of the Securities has a greater negative impact on the Basket Performance which cannot be fully offset by positive performances of all other Underlyings. Therefore the risk for any potential investor of a significant or total loss with respect to the purchase price paid is higher.

The impact of the individual performance of each Underlying on the Basket Performance may depend on the weighting assigned to such Underlying within the basket, the higher the weighting, the greater the impact. Furthermore, prospective investors should also consider that the risk may increase in case of correlation among the different Underlyings.

2.9 No additional payments or other distributions with respect to Certificates or Warrants

If the Certificates or the Warrants do not provide for the payment of a Bonus Amount, a Fixed Amount or any other additional amount during their terms (§ 3 of the Terms and Conditions), they do not

represent a claim to any such payment and thus do not generate any regular income. Possible losses in relation to the value of the Certificates or the Warrants can therefore not be compensated by any other income from the Certificates or the Warrants. In no case do the Certificates or the Warrants generate dividend payments.

2.10 Participation in the performance of the Underlying(s)

Potential investors should consider that in accordance with the Terms and Conditions the participation in the performance of the Underlying(s) and, consequently, the payment per Security will be influenced by a Participation Factor. As a result and in contrast to a direct investment in the Underlying(s) the performance of the Underlying(s) will affect the payments disproportionately.

2.11 Continuous price of the Underlying and price of the Underlying on a valuation date (American barrier)

In order to assess the extent to which the price of the Underlying, at any time during a specific period, reaches a certain percentage of the Initial Price or the Strike Price, as the case may be, all prices of the Underlying shall be used, while the calculation of the Redemption Amount or the Cash Amount, as the case may be, is based on the Reference Price of the Underlying on the final valuation date.

2.12 Maximum amount

In the case of Securities where, pursuant to the relevant Terms and Conditions, the payment to be made in connection with the Security is limited to a maximum amount (whether in relation to the Redemption Amount or the Cash Amount, as the case may be, Interest Amount (in the case of Notes) or any other amount), the investor will not participate in any further performance of an Underlying that might be positive for the investor. While, on the one hand, the investor's yield is capped by way of the maximum amount, the investor may, on the other hand, bear the full loss risk in the event of an adverse performance of an Underlying.

2.13 Disruption event and postponement of payments

The Issuer may be entitled to determine market disruptions or other events which might result in a postponement of a calculation and/or of any payments and which might affect the value of the Securities.

In addition, in certain cases stipulated in the Terms and Conditions, the Issuer (especially if a market disruption event lasts several days) may estimate certain prices that are relevant with regard to payments or the reaching of barriers (leading to the Securities being worthless). These estimates may deviate from their actual value.

2.14 Dependency of the Redemption Amount or the Cash Amount, as the case may be, of the Securities on the performance of the conversion rate

In the case of Securities where, pursuant to the relevant Terms and Conditions, the value of the Redemption Amount or the Cash Amount, as the case may be, is dependent on the performance of a conversion rate, the investor participates other than in the performance of an Underlying also in the performance of a conversion rate. This can be positive and negative for the investor. While, on the one hand, the Redemption Amount or the Cash Amount, as the case may be, may increase in case of a positive performance of the conversion rate, on the other hand, the Redemption Amount or the Cash Amount, as the case may be, may decrease in case of a negative performance of the conversion rate.

The Conversion Rate is an exchange rate. Exchange rates indicate the value ratio of a certain currency against another currency, i.e. the number of units in one currency that may be exchanged for one unit in the other.

Exchange rates are derived from the supply and demand in relation to currencies in the international foreign exchange markets. On the one hand, they are influenced by various economic factors, such as the rate of inflation in the relevant country, interest differences abroad, the assessment of the relevant economic development, the global political situation, the convertibility of one currency into another and

the security of a financial investment in the relevant currency. On the other hand, they are influenced by measures undertaken by governments and central banks (e.g. foreign exchange controls and restrictions). In addition to these foreseeable factors, however, other factors might also be relevant that are difficult to estimate, such as factors of a psychological nature (e.g. crises of confidence in the political leadership of a country or other speculation). In some cases, such psychological factors may have a significant effect on the value of the relevant currency.

2.15 Leverage effect

Risk of disproportionately high price losses

The prices of the Securities in the secondary market may be subject to significant fluctuations if the value of the Securities reacts disproportionately strongly to the performance of the Underlying(s).

This will, for instance, be the case if the formula that is used for determining the Redemption Amount or the Cash Amount, as the case may be, a bonus amount or any other additional amount and/or the interest payable (in the case of Notes) or the delivery obligations in connection with the Securities includes a participation factor that is greater than 1 (100%). In that case, a change in the price of the Underlying(s) will reinforce the effect on the price of the Securities, i.e. a favourable change in the price of the Underlying(s) will have a disproportionately favourable effect on the price of the Securities and an unfavourable change in the price of the Underlying will have a disproportionately unfavourable effect on the price of the Securities. This is referred to as a **leverage effect**. The risk of disproportionately high price losses also occurs if the price of the Underlying(s) (particularly shortly before the maturity of the Securities) gets close to a threshold that is significant with regard to the amount of the Redemption Amount or the Cash Amount, as the case may be, or any other additional amount as even the smallest fluctuations in the price of the Underlying(s) can result in major changes in the price of the Securities.

Risk of disproportionately low price gains

On the other hand, the prices of the Securities in the secondary market may be subject to especially low fluctuations if the value of the Securities reacts disproportionately weakly to the performance of the Underlying(s).

This will, for instance, be the case if the formula that is used for determining the Redemption Amount or the Cash Amount, as the case may be, a bonus amount or any other additional amount and/or the interest payable or the delivery obligations in connection with the Securities includes a participation factor that is **lower** than 1 (100%), since this means that the investor will only participate on a pro rata basis in a performance that is favourable for the investor. In that case, the yield resulting from the purchase of the Securities may be lower than that resulting from a direct investment in the Underlying(s).

In addition, a risk of disproportionately low price gains is particularly associated with Securities that provide for a maximum amount. If, for instance, the price of the Underlying(s) is significantly above the barrier (cap) that entitles the holder of the Security to receive the maximum amount and it is no longer to be expected that the price will once again fall below the cap before the relevant valuation date of the Securities, the price of the Securities will change only insignificantly or not at all, even if the price of the Underlying(s) is subject to major fluctuations.

2.16 Reverse Structures

In the case of Securities with a reverse structure, investors will participate positively in a negative performance of the Underlying(s) and vice versa. In other words, the following normally applies: The lower the relevant value of the Underlying(s) is on the relevant valuation date, the higher the Redemption Amount or the Cash Amount, as the case may be, will be (subject to a cap). However, the higher the value of the Underlying(s), the lower the Redemption Amount or the Cash Amount, as the case may be, will be. In the case of a participation rate of 100% of the price performance of the Underlying, it means that, in the event of an increase in the price of the Underlying(s) by 100% or more, no amount will be payable and investors will suffer a total loss. If the Securities are equipped with a reverse element with a participation rate other than 100%, this means that an increase in the

price of the Underlying(s) will have a disproportionately unfavourable effect on the investor. In addition, the possible yields on Securities with a reverse element are generally limited because the negative performance of the Underlying(s) cannot be more than 100%.

2.17 Risks in relation to physical settlement

The Terms and Conditions may provide that the Securities relating to one or more Underlying(s), depending on the performance of an Underlying or based on other conditions, may not have to be redeemed by a cash payment but by delivery of the Underlying (e.g. shares), one of the Underlyings, a component of an Underlying or other securities (the "**Object of Physical Settlement**"). The number of units of the Object of Physical Settlement to be delivered is determined in accordance with the Terms and Conditions of the Securities. Accordingly, in the event that the Securities are redeemed by physical settlement, the investor will not receive a cash payment, but instead units of the Object of Physical Settlement.

The Terms and Conditions may provide that the Issuer is not entitled to a delivery of securities other than those on whose price redemption is based. This means that, although the Underlying is relevant for the redemption type and amount, redemption may take place by delivery of a different security.

This means that investors should obtain information regarding the Objects of Physical Settlement (where applicable) prior to purchasing any Securities and that they should not assume that they will be able to sell the Objects of Physical Settlement for a specific price. The value of an Object of Physical Settlement at the time of its delivery may be significantly lower than at the time of the purchase of the Securities (or than the price paid for the purchase of the Securities) or at the time at which it is decided whether settlement is to take place by physical delivery or cash payment (valuation day). In the event of physical settlement, investors will be exposed to the risks that are associated with the relevant Object of Physical Settlement, such as a loss risk, and may even suffer a total loss.

2.18 Risk factors relating to the Underlying

The value of a Security's Underlying depends upon a number of factors that may be interconnected. These may include economic, financial and political events beyond the Issuer's control.

The past performance of an Underlying should not be regarded as an indicator of its future performance during the term of the Securities.

- **Particular risks of Securities with shares as Underlying**

Securities relating to shares are associated with particular risks beyond the Issuer's control (such as the risk that the respective company will be rendered insolvent, that insolvency proceedings or comparable proceedings with regard to the assets of the company according to the applicable law of the company might be instituted or any other events in relation to the company occur that are economically equivalent) which could lead to a total loss of the investor's capital).

In addition, there may be risks that occur in relation to dividend payments by the company. The performance of the shares depends to a very significant extent on developments on the capital markets, which in turn depend on the general global economic situation and more specific economic and political conditions. Shares in companies with low to medium market capitalisation may be subject to even higher risks (e.g. relating to their volatility or insolvency) than is the case for shares in larger companies. Moreover, shares in companies with low capitalisation may be extremely illiquid as a result of low trading volumes may occur. Holders of Securities that are linked to shares, unlike investors which directly invest in the shares, do not receive dividends or other distributions payable to the holders of the underlying Shares. Beside this, paid or expected payouts on the underlying Share (such as dividends), which might be retained by the Issuer, may not be taken into account in the pricing of the Securities. Expected dividends may be deducted prior to the "ex dividend" day in relation to the Share, based on the expected yields for the entire term or a certain portion thereof. Any dividend estimate used by the market maker in its assessment may change during the term of the Securities or deviate from the dividend generally expected by the market or the actual dividend. This can also affect the pricing process in the secondary market.

There is a possibility that the Issuer or any of its affiliates may hold shares in the company or companies that issued the Underlying(s), which could lead to additional interest conflicts.

Furthermore, the performance of shares depends to a very significant extent on developments in the capital markets, which in turn depend on the general global economic situation and more specific economic and political conditions. Shares of companies with low to medium market capitalisation may be subject to even higher risks (e.g. relating to their volatility or insolvency) than is the case for shares in larger companies. Moreover, shares in companies with low capitalisation may be extremely illiquid as a result of low trading volumes.

Shares of companies which have their statutory seat or significant business operations in countries with limited certainty of law are subject to additional risks such as, for instance, government interventions or nationalisation which may lead to a total or partial loss of the invested capital or of access to the capital invested in that country. This may then result in a total or partial loss in relation to the value of the share. The realisation of such risks may also result in a total or partial loss of the invested capital for holders of Securities that are linked to such shares.

Holders of Securities that are linked to shares, unlike investors which directly invest in the shares, do not receive dividends or other distributions payable to the holders of the underlying shares.

If the Underlying consists of registered shares or if the shares contained in an Underlying (e.g. a basket) are registered and the Issuer is obligated under the Terms and Conditions to deliver these registered shares to the investor, the rights arising from the shares (e.g. attendance of the annual general meeting and exercise of the shareholders' voting rights) may generally be exercised only by those shareholders whose names are listed in the company's register of members or a similar official list. An obligation of the Issuer to deliver shares is principally limited to the provision of the shares in a form and with characteristics deliverable on the scheduled maturity date in line with relevant stock exchange rules and does not include registration in the register of members. A claim arising from non-performance, particularly for unwinding the transaction or damages, is excluded in such a case.

If the Underlying consists of securities in lieu of shares (e.g. American Depositary Receipts ("**ADRs**") or Global Depositary Receipts ("**GDRs**"), together "**Depositary Receipts**"), additional risks might occur. ADRs are securities issued in the United States of America that take the form of participation certificates in relation to a portfolio of shares held in the home country of the issuer of the underlying shares outside the United States of America. GDRs are also securities that take the form of participation certificates in relation to a portfolio of shares held in the home country of the issuer of the underlying shares. They normally differ from the participation certificates referred to as ADRs in that they are publicly offered and/or issued outside the United States of America. Each Depositary Receipt represents one or more shares or a fraction of a security in a foreign corporation. In the case of both types of Depositary Receipt, the legal owner of the underlying share is the depositary bank, which also acts as the issuing agent of the Depositary Receipts.

Depending on the jurisdiction in which the Depositary Receipts were issued and the laws by which the depositary contract is governed, it cannot be ruled out that the holder of the Depositary Receipts may not be recognised as the actual beneficial owner of the underlying shares in the relevant jurisdiction. Particularly in the case that the depositary bank becomes insolvent and/or debt enforcement proceedings are initiated with regard to it, the relevant underlying shares may be subjected to disposal restrictions and/or utilised commercially in the context of debt enforcement measure undertaken against the depositary bank. In that case, the relevant holder will forfeit the rights in the underlying shares represented by the relevant Depositary Receipt. This means that the Depositary Receipt as Underlying will be rendered worthless, so that the Securities relating to that Depositary Receipt will also be rendered worthless. In such a scenario, the investor faces a risk of total loss.

It must also be taken into account that the depositary bank may stop offering Depositary Receipts at any time and that, in that case or if the depositary bank becomes insolvent, the Issuer will, subject to more detailed provisions set out in the Terms and Conditions, be entitled to adjust the Terms and Conditions and/or terminate the Securities.

- **Particular risks of Securities with indices as Underlying**

Securities relating to one or several indices involve, in particular, the following risks:

Dependency on the value of the index components

The value of an index is calculated on the basis of the value of its components. Changes in the prices of index components, the composition of an index as well as factors that (may) influence the value of the index components also influence the value of the Securities that relate to the relevant index and can thus influence the yield from an investment in the relevant Securities. Fluctuations in the value of one index component may be compensated or aggravated by fluctuations in the value of other index components. The past performance of an index does not represent any guarantee of its future performance. Under certain circumstances, an index used as an Underlying may (i) not be available for the full term of the Securities, (ii) be substituted or (iii) continue to be calculated by the Issuer itself. In these or other cases mentioned in the Terms and Conditions, Securities may also be terminated by the Issuer.

The index underlying the Securities may reflect the performance of assets of some countries or some industries only. In that case, investors are exposed to a concentration risk. In the event of an unfavourable economic development in a country or in relation to a particular industry, investors may be adversely affected. If several countries or industries are represented in the index, it is possible that these countries or the industries are weighted unevenly. This means that, in the event of an unfavourable development in one country or industry with a high index weighting, the value of the index may be affected disproportionately by this adverse development.

Investors should note that the selection of an index is not based on the expectations or estimates of the Issuer in respect of the future performance of the selected index. Investors should therefore make their own estimates in respect of the future performance of an index on the basis of their own knowledge and sources of information.

Price index – dividends are not taken into account

The index referred to in the relevant Terms and Conditions may be a price index. Unlike in the case of performance indices, dividend distributions in relation to the shares contained in price indices will result in a reduction of the index level. This means that investors will not participate in dividends or other distributions in relation to shares contained in price indices.

No influence of the Issuer

As a general rule, the Issuer has no influence on the composition and performance of an index underlying the Securities or the performance of the relevant index components, unless the Issuer and the index sponsor are identical.

No liability of the index sponsor

If the Securities relate to an index that is not calculated by the Issuer, the issue, marketing and distribution of the Securities will normally not be supported by the relevant index sponsor. In that regard, the index is composed and calculated by the respective index sponsor without taking into account the interests of the Issuer or the holders of the Securities. The index sponsors do not assume any obligation or liability in respect of the issue, sale and/or trading of the Securities.

No recognised financial indices, no independent third party

The Securities may relate to one or more indices which are not recognised financial indexes but indices that have been specially created for the issuance of the relevant Security. The index sponsors of such indices might not be independent from the Issuer and may thus favour the interests of the Issuer over the interests of the holders of the Securities.

Currency risks

The prices of the index components may be expressed in a currency (e.g. U.S.\$) that is different from the currency in which the Securities were issued (e.g. Euro). In that case, the Redemption Amount or the Cash Amount, as the case may be, of the Securities, during their term, may not only depend on the performance of the Underlying, but also on the development of the exchange rates of one or more foreign currencies against the currency of issue.

Index fees

Certain fees, costs, commissions or other composition and calculation charges may be deducted when calculating the value of an index. As a result, the performance of the individual index components is not acknowledged in full when calculating the performance of the respective index, but instead the performance is reduced by the amount of such fees, costs, commissions and other charges, which may to some extent erode any positive performance displayed by the individual components. It should also be noted that such costs may well also be incurred if the index returns negative performance, which will reinforce the negative performance even further.

Index composition publication

The composition of the indices may have to be published on a website or in other media mentioned in the terms and conditions of the relevant index. The publication of the updated composition of the respective index on the website of the relevant index sponsor might, however, be delayed considerably, sometimes even by several months. In those cases, the published composition may not always correspond to the actual composition of the relevant index.

Particular risks in relation to commodity indices

If the Securities relate to commodity indices, the particular risks set out below may occur, which may have a negative effect on the value of the underlying commodity index and, thus, the value of the Securities themselves.

Synthetic

A commodity index is purely synthetic. There is no pool of commodity futures contracts to which any person is entitled or in which any person has any ownership interest or which serve as collateral for the return on any investment in Securities referencing a commodity index.

Price return risk

A commodity index is comprised of futures on commodities and/or spot prices. Price movements in commodity futures can be very volatile; they can change frequently and by large amounts. Prices are influenced by a number of factors including, without limitation, changing supply and demand relationships, the price of the underlying commodity, government policies and programs, political and economic events, changes in applicable interest rates and inflation rates and the emotions of market participants. The price of any one commodity may also be correlated to some extent with the price of another commodity, so price movements in one commodity may also affect the price of another. The commodities markets are also subject to temporary trading suspensions, distortions or other disruptions due to various factors, including the lack of liquidity in the markets, the participation of speculators and government regulation and intervention. Any of these factors (alone or in combination) may affect the price of the commodity futures that comprise the commodity index and therefore the level of the commodity index and the payout on Securities referencing a commodity index. Historical prices for commodity futures should not be considered to be indicative of future prices, the level of either a commodity index or the amount that may be due under Securities referencing a commodity index.

Roll return risk

The commodity futures contained in a commodity index may have a variety of maturity dates. In accordance with a schedule or mechanism controlled by the relevant index sponsor, contracts (i.a. being about to mature or ceasing to be available for trading before the end of the next roll period) will be rolled into longer dated contracts. In the process of rolling from one contract to the next contract the nearby contract is typically sold and the longer dated contract is typically purchased, whereby each transaction is conducted at the market price with respect to the relevant contract. Although the cash value of a commodity futures contained within the commodity index, and hence the value of the commodity index, is unaffected, the physical quantity of the commodity futures represented in the commodity index will nevertheless change in order to ensure that the value of the commodity index remains constant. This concept - known as "Roll Yield" - may give the misleading impression that a commodity index outperforms or lags the value of the commodity futures. However, given that the value of the commodity index is maintained in each roll the investor will not benefit from backwardation nor lose money as a result of contango. Any lower or higher returns indicated by taking ratios between different contracts are not investible which implies that it is not possible to purchase or sell one futures contract at the price of another.

Diversification

Diversification is generally considered to reduce the amount of risk associated with investment returns. A commodity index may contain futures on a variety of commodity with different maturities. However, there can be no assurance that the commodity index will be sufficiently diversified at any time to reduce or minimise such risks to any extent.

- **Particular risks in relation to Securities with commodities such as metals (i.e. precious and industrial metals) as Underlying**

Investors in Securities linked to the price of commodities are exposed to significant price risks as prices of commodities are subject to great fluctuations. Commodities are traded on specialised exchanges or in interbank trading in the form of over-the-counter (OTC) transactions. The prices of commodities are influenced by a number of factors, including, inter alia, the following factors:

Cartels and regulatory changes

A number of producers or producing countries of commodities have formed organisations or cartels to regulate supply and therefore influence prices. However, the trading in commodities is also subject to regulations imposed by supervisory authorities or market rules whose application may also affect the development of the prices of the relevant commodities.

Cyclical supply and demand behaviour

Agricultural commodities are produced at a particular time of the year but are in demand throughout the year. In contrast energy is produced without interruption, even though it is mainly required during cold or very hot times of the year. This cyclical supply and demand pattern may lead to strong price fluctuations.

Direct investment costs

Direct investments in commodities are associated with costs for storage, insurance and taxes. In addition, no interest or dividends are paid on commodities. The overall yield of an investment in commodities is influenced by these factors.

Inflation and deflation

The general development of prices may have a strong effect on the price development of commodities.

Liquidity

Many markets of commodities are not very liquid and may therefore not be able to react rapidly and sufficiently to changes in supply and demand. In case of low liquidity, speculative investments by individual market participants may lead to price distortions.

Political risks

Commodities are frequently produced in emerging markets and subject to demand from industrialised countries. The political and economic situation of emerging markets, however, is often a lot less stable than that of industrialised countries. Emerging markets are exposed to a greater risk of rapid political changes and adverse economic developments. Political crises can damage investors' confidence, which can in turn influence commodities prices. Wars or conflicts may change the supply and demand in relation to certain commodities. It is also possible that industrialised countries impose embargoes regarding the export and import of goods and services. This may have a direct or indirect effect on the price of the commodities that serve as the Underlying of the Securities.

Weather and natural disasters

Unfavourable weather conditions may have a negative effect on the supply of specific commodities for an entire year. A crisis of supply of this sort may lead to strong and incalculable price fluctuations.

• **Particular risks in relation to Securities with futures contracts as Underlying**

Futures contracts are standardised forward transactions relating to financial instruments such as shares, indices, interest rates or foreign currencies (so-called financial futures) or commodities such as copper and uranium, wheat or sugar (so-called commodities futures).

A futures contract represents the contractual obligation to purchase or sell a certain quantity of the relevant contractual object at a certain date and price. Futures contracts are traded on futures and options exchanges and are standardised for that purpose with regard to size of contract, type and quality of the contractual object and potential delivery places and dates.

As a rule, there is a close correlation between the price performance of an asset that underlies a futures contract and is traded on a spot market and the corresponding futures market. However, futures contracts are generally traded at a premium or discount in relation to the spot price of the underlying asset. This difference between the spot and futures price, which is referred to as "basis" in futures and options exchange jargon, on the one hand results from the inclusion of the costs that are normally incurred in spot transactions (storage, delivery, insurance, etc.) and/or the revenues that are normally associated with spot transactions (interest, dividends, etc.), and on the other hand from the differing valuation of general market factors in the spot and the futures market. In addition, depending on the value, there can be a significant gap in terms of the liquidity in the spot and the corresponding futures market.

As the Securities relate to the futures contracts specified in the Terms and Conditions, investors, in addition to knowing the market for the relevant asset that underlies the relevant futures contract, must have know-how as to the workings and valuation factors of forward/futures transactions in order to be able to correctly assess the risks associated with an investment in those Securities.

As futures contracts expire on a certain date, the Terms and Conditions may provide that the Issuer (particularly in the case of Securities with a longer term), at a time stipulated in the Terms and Conditions, replaces the futures contract provided for as the Underlying in the Terms and Conditions by another futures contract that has a later expiry date than the initial underlying futures contract, but is otherwise subject to the same contractual specifications (so-called "**Roll-over**"). The costs associated with such a Roll-over will be taken into account in accordance with the Terms and Conditions in connection with the adjustment of any prices and/or thresholds of the Securities in conjunction with the Roll-over and may have a significant effect on the value of the Securities. The Terms and Conditions may provide for additional cases in which the Issuer may replace the initial

futures contract and/or change parameters of the Terms and Conditions and/or terminate the Securities.

Futures Contracts on Indices:

The value of an index is calculated on the basis of the value of its components. Changes in the prices of index components, the composition of an index as well as factors that (may) influence the value of the index components also influence the value of the Securities that relate to futures contracts on the relevant index and can thus influence the yield from an investment in the relevant Securities.]

Futures Contracts on Bonds:

Holders of Securities linked to bond futures contracts are, in addition to the insolvency risk of Commerzbank AG as the Issuer of the Securities, also exposed to the insolvency risk of the issuers of the bond(s) underlying the respective futures contracts. If the issuer of a bond underlying a futures contract does not punctually perform its obligations under the relevant bond or becomes insolvent, this will cause a decrease in the price of the bond (possibly to zero) and can in turn lead to significant price losses of the respective futures contracts and therefore of the Securities themselves. This may possibly lead to a total loss of the invested capital for the holder of the Securities.

The price quotation of Futures Contracts on the Futures Exchange could be in units (e.g. percentage points in case of the Euro Bund Futures Contract) or in fractions of decimal figures (e.g. 0.5/32 in case of the 10-Year U.S. Treasury Note Futures Contract, thus a price of 124'165 representing 124 16.5/32).

Futures Contracts on Commodities:

Commodities can be divided into several categories, e.g. minerals (e.g. oil, gas or aluminium), agricultural products (e.g. wheat or maize) and metals (e.g. copper, uranium). Most commodities are traded on specialised exchanges or in interbank trading in the form of over-the-counter (OTC) transactions.

Holders of Securities linked to the price of commodities are exposed to significant price risks as prices of commodities are subject to great fluctuations. The prices of commodities are influenced by a number of factors, including, inter alia, the following factors:

Cartels and regulatory changes

A number of producers or producing countries of commodities have formed organisations or cartels to regulate supply and therefore influence prices. However, the trading in commodities is also subject to regulations imposed by supervisory authorities or market rules whose application may also affect the development of the prices of the relevant commodities.

Cyclical supply and demand behaviour

Agricultural commodities are produced at a particular time of year but are in demand throughout the year. In contrast, energy is produced without interruption, even though it is mainly required during cold or very hot times of the year. This cyclical supply and demand pattern may lead to strong price fluctuations.

Direct investment costs

Direct investments in commodities are associated with costs for storage, insurance and taxes. In addition, no interest or dividends are paid on commodities. The overall yield of an investment is influenced by these factors.

Inflation and deflation

The general development of prices may have a strong effect on the price development of commodities.

Liquidity

Many markets of commodities are not very liquid and may therefore not be able to react rapidly and sufficiently to changes in supply and demand. In case of low liquidity, speculative investments by individual market participants may lead to price distortions.

Political risks

Commodities are frequently produced in emerging markets and subject to demand from industrialised countries. The political and economic situation of emerging markets, however, is often a lot less stable than that of industrialised countries. Emerging markets are exposed to a greater risk of rapid political changes and adverse economic developments. Political crises can damage investors' confidence, which can in turn influence commodity prices. Wars or conflicts may change the supply and demand in relation to certain commodities. It is also possible that industrialised countries impose embargoes regarding the export and import of goods and services. This may have a direct or indirect effect on the price of the commodities that serve as an Underlying of the Securities.

Weather and natural disasters

Unfavourable weather conditions and natural disasters may have a long-term negative effect on the supply of specific commodities for an entire year. A crisis of supply of this sort may lead to strong and incalculable price fluctuations.

• **Particular risks of Securities with funds as Underlying**

Securities that are linked to a fund involve, in particular, the following risks:

Fees

The performance of a fund is in part influenced by the fees that are directly or indirectly charged to the fund assets.

The following fees (without limitation) can be regarded as fees directly charged to the fund assets: fund management fees (including fees in respect of administrative tasks), depositary bank fees, standard bank deposit charges, possibly including the standard bank charges for holding foreign securities abroad, printing and distribution costs in relation to the annual and semi-annual reports aimed at investors, auditors' fees for auditing the fund, distribution costs, etc. Additional fees and expenses may arise due to the contracting of third parties for services in connection with the management of the fund or the calculation of performance-based portfolio management fees.

Commerzbank AG or any of its affiliates may be the beneficiary of such fees or obtain rebate on such fees from third parties.

In addition to the fees that are directly charged to the fund assets, the fees that are indirectly charged to the fund assets also have a negative effect on the performance of the fund. These indirect fees include (without limitation) management fees that are charged to the fund for investment units held in the fund assets.

Market risk

As price or value reductions in relation to the securities purchased by the fund or other investments are also reflected in the prices of the individual fund units, there is a general risk of falling unit prices. Even if the fund's investments are much diversified, there is a risk that an adverse overall development in certain markets or exchanges can cause unit prices to fall.

Illiquid Investments

Funds may invest in assets which are illiquid or subject to a minimum holding period. Therefore, it may be difficult for the fund to sell these assets at all or at a reasonable price when it is required to sell

them to generate liquidity. In particular, this can be the case if investors wish to redeem their fund units. The fund may suffer substantial losses if it is forced to sell illiquid assets in order to redeem fund units or if the sale of illiquid assets is only possible at a low price. This may negatively affect the value of the fund and, thus, the value of the Securities.

Investments in illiquid assets may also lead to difficulties in calculating the net asset value (the "NAV") of the fund (see below). This, in turn, can result in delays with regard to payments in connection with the Securities.

Delayed NAV publication

Under certain circumstances, the publication of a fund's net asset value may be delayed. This may result in a delayed redemption of the Security and, e.g. in the case of a negative market development, have a negative effect on the value of the Security. In addition, investors bear the risk that, in the case of a delayed redemption of the Securities, their reinvestment of the relevant proceeds may be subject to delays and possibly unfavourable terms.

Dissolution of a fund

It cannot be ruled out that a fund may be dissolved during the term of the Securities. In that case, the Issuer or the Calculation Agent will normally be entitled to perform adjustments with regard to the Securities in accordance with the relevant terms and conditions. Such adjustments may, in particular, provide for the substitution of the relevant fund by another fund. In addition, the Security may also be terminated early by the Issuer in that case.

Postponement or suspension of redemptions

The fund may redeem no or only a limited quantity of units at the scheduled times that are relevant for the calculation of the Redemption Amount or the Cash Amount, as the case may be, of the Securities. This can result in a delayed redemption of the Securities if such a delay is provided for in the terms and conditions in the event that the termination of the hedge transactions concluded by the Issuer at the time of the issue of the Securities is delayed. In addition, such a scenario may negatively affect the value of the Securities.

Concentration on certain countries, industries or investment classes

The fund may concentrate its investments on assets relating to certain countries, industries or asset classes. This may lead to price fluctuations in relation to the fund that are higher and occur within a shorter period of time than would be the case if the risks were more diversified between industries, regions and countries.

Currency risks

The Securities may be linked to funds which are denominated in another currency than the currency in which the Securities are denominated or to funds which invest in assets that are denominated in another currency than the Securities. Investors may therefore be subject to a significant currency risk.

Markets with limited certainty of law

Funds that invest in markets with limited certainty of law are subject to certain risks such as, for instance, unexpected government interventions, which may lead to a reduced fund value. The realisation of such risks may also result in a total or partial loss of the invested capital for the holder of the Securities that are linked to such a fund.

Effects of regulatory framework conditions

Funds might not be subject to any regulation or may invest in investment vehicles which are not subject to any regulation. Conversely, the introduction of regulation of a previously unregulated fund may create significant disadvantages for such funds.

Dependency on asset managers

The performance of the fund will depend on the performance of the assets selected by the fund's asset manager for the purposes of implementing the relevant investment strategy. In practice, the performance of a fund largely depends on the competence of the managers taking investment decisions. The resignation or substitution of such persons may lead to losses and/or the dissolution of the relevant fund.

The investment strategies, restrictions and objectives of funds can provide an asset manager with significant room for manoeuvre when investing the relevant assets, and there is no guarantee that the asset manager's investment decisions will result in profits or provide efficient protection from market or other risks. There is no guarantee that a fund will succeed in implementing the investment strategy detailed in its sales documentation. This means that, even if the performance of a fund with similar investment strategies is favourable, a fund (and thus the Securities) may undergo a negative performance.

Particular risks in relation to funds of funds

If so-called funds of funds, i.e. investment funds that substantially invest in other funds ("**target funds**"), underlie the Securities, the performance of the target funds will have a significant effect on the performance of the Securities.

The risks associated with the target fund units acquired for the fund(s) are closely related to the risks associated with the assets contained in, and/or the investment strategies pursued by, the relevant target funds. However, the aforesaid risks can be mitigated by diversifying the assets within the target funds and by way of a diversification of the fund(s).

As the managers of the individual target fund(s) act independently of one another, however, it is possible that several target funds pursue the same or diametrically opposed investment strategies. This can result in the accumulation of existing risks, and possible opportunities may be cancelled out.

The Issuer will often not be aware of the current composition of the target funds. If their composition does not correspond to the Issuer's assumptions or expectations, this may have a negative effect on the investors in the Securities because the actions of the issuer of the Securities will be delayed.

Particular risks in relation to hedge fund units

If the Securities relate to fund units in a so-called hedge fund, the particular risks set out below may occur, which may have a negative effect on the value of the underlying fund units and, thus, the value of the Securities themselves.

Hedge funds are generally permitted to utilise highly risky investment strategies and techniques as well as highly complex capital investment instruments. The assets managed by hedge funds are often invested in derivative instruments such as options and futures in the international futures markets.

Short sales and the use of additional borrowed funds may also form part of a hedge fund's investment strategy. It is not possible to provide a comprehensive or even exhaustive list of all investment strategies that may be pursued by hedge funds. When choosing individual investments and implementing a hedge fund's strategy, the manager has significant room for manoeuvre since he/she is subject to only a few contractual and statutory restrictions. Therefore, investors in hedge funds are even more dependent on the suitability and skills of the relevant manager.

The use of highly risky and complex investment techniques and strategies by hedge funds may result in high losses. As part of their investment strategy, some hedge funds purchase risky securities, e.g. from companies facing economic difficulty and possibly undergoing complex restructuring processes. The success of such measures, however, is uncertain, so that these hedge fund investments are associated with significant risks and are exposed to a high loss risk.

If a hedge fund engages in short selling, it sells securities it does not possess at the time of the transaction and has to procure from third parties by way of securities borrowing. As a short seller, the

hedge fund expects the price of the security to fall and therefore relies on its ability to purchase the security at a more favourable price at a later date. A profit is to be generated from the difference between the original sales proceeds and the later actual purchase price. If, however, a different price development occurs (i.e. the price of the short-sold security rises), the hedge fund is exposed to a loss risk that is theoretically unlimited because it must purchase the borrowed securities on current standard market terms in order to return them to their lender.

For the purposes of implementing their investment strategies, hedge funds may utilise all types of derivatives which are traded on and off stock exchanges and which come with the specific risks associated with investments in derivative instruments. Especially as a party to an option or forward transaction (e.g. currency forward, futures and swap transactions), the hedge fund is exposed to a high loss risk if the market development anticipated by it or its manager is not realised. In the case of exchange-traded or other derivatives, the hedge fund is also exposed to a counterparty credit risk.

Hedge funds often largely finance their investments by way of borrowing. This can result in a so-called leverage effect because capital in addition to that provided by the investors can be invested. In the event of a negative market development, the hedge fund is exposed to an increased loss risk because interest and principal repayments have to be made in any case with regard to the borrowed funds. If all of the invested capital is lost, the units in a hedge fund are rendered worthless.

Particular risks in relation to funds of hedge funds

Funds of hedge funds invest in various single hedge funds which, in turn, implement a multitude of different and potentially highly risky investment strategies. If the Securities relate to fund units in a fund of hedge funds, the following risks in addition to those mentioned in the above paragraphs entitled Risks in relation to Funds of Funds and Particular Risks in relation to Hedge Fund Units may occur, which may have a negative effect on the value of the units in the fund of hedge funds and, thus, the value of the Securities themselves. Each hedge fund in which a fund of hedge funds invests may charge fees that can in part be well above the market average and may be dependent on or independent of the performance of the hedge fund or its net assets. Thus, the relevant fees may cumulate or double.

Particular risks in relation to exchange traded funds

If the Securities relate to units in an exchange traded fund ("**ETF**"), the particular risks set out below may occur, which may have a negative effect on the value of the underlying ETF units and, thus, the value of the Securities themselves.

Dependency on the value of the index components

ETFs pursue the objective of tracking, as accurately as possible, the performance of an index, commodity, basket or particular individual assets (the "**Reference Underlying**"). Thus, the value of an ETF is particularly dependent upon the performance of the Reference Underlying. However, it cannot be ruled out that the performance of the ETF does not correspond to that of the Reference Underlying (so-called "tracking error").

Unlike other investment funds, there is generally no active management of ETFs by the issuing investment company. This means that decisions regarding the purchase of assets are dictated by the Reference Underlying. If the value of the Reference Underlying falls, this may thus result in an unlimited price loss risk in relation to the ETF, which may have a negative effect on the value of the Securities.

Usage of derivative financial instruments

ETFs whose performance is linked to an index or a basket will often invest in securities not contained in that index or basket, derivative financial instruments and techniques will be used in order to link the value of the units to the performance of the relevant index or basket. The use of such derivative financial instruments and techniques involves risks for the fund that, in some cases, can be greater than the risks associated with traditional forms of investment. In addition, losses may be incurred

because of the fact that the counterparty to a transaction defaults through the use of derivatives, e.g. in the case of OTC swap transactions.

Liquidation risks in case of collaterals

Any collateral provided to the investment company issuing the ETFs by counterparties in connection with securities lending, repurchase and OTC transactions in order to minimise credit risk is subject to the statutory and regulatory provisions. It cannot be ruled out that individual items of collateral may be worthless at, and/or rendered completely worthless prior to, the time of their utilisation. Therefore, there is a risk of a total loss in respect to the ETF share and that investors therefore could suffer a total loss in respect of their Securities.

Risk of a replacement of the index

Under certain circumstances, the calculation or publication of the index which will be replicated by the ETF could be suspended or even terminated. Furthermore, the index components or basket components could be changed or replaced by another index or basket

Particular risks in relation to property funds

If the Securities relate to fund units in a property fund, the particular risks set out below may occur, which may have a negative effect on the value of the underlying fund units and, thus, the value of the Securities themselves.

Property investments are subject to risks that may affect the value of the fund units in the event of changes in the yields, expenses and the fair market value of the relevant properties. The same applies to properties held by property developers. Risks may arise from (without limitation) vacant properties, lost rents, unforeseen maintenance expenses or building cost increases, risks in relation to third-party warranty claims, risks in connection with existing contamination and the defaulting of contracting parties. If a property fund acquires an interest in a property development company, this may give rise to risks in relation to the company's legal form as well as in connection with a possible defaulting of shareholders/partners or changes in the tax and corporate frameworks. In the event of properties abroad, additional risks may arise from, for instance, deviating laws and tax rules. Currency and transfer risks might also apply in this regard.

Unlike with other investment funds, the redemption of the units in a property fund may be suspended by up to two years if the fund's available funds, in the case of a large number of redemption requests, are insufficient as to cover the payment of the redemption price and to safeguard proper management or cannot be provided at short notice. This may result in a delay in the redemption of the Securities. In addition, such a scenario may negatively affect the value of the Securities because the redemption price paid by the property fund, following continued redemption, may be lower than prior to the suspension.

- **Particular risks of Securities with bonds as Underlying**

Investors in Securities linked to a bond or to various bonds are, in addition to the insolvency risk of Commerzbank AG as issuer of the Securities, exposed to the insolvency risk of the issuers of such underlying bond(s). If the issuer of a bond underlying a Security does not punctually perform its obligations under the relevant bond or becomes insolvent, this will cause the value of the bond to fall (possibly to zero) and can in turn lead to significant price losses in the secondary market for the Securities and, possibly, a total loss of the invested capital for the holder of the Securities.

- **Particular risks in relation to Securities with currency exchange rates as Underlying**

Currency exchange rates indicate the value ratio of a certain currency against another currency, i.e. the number of units in one currency that may be exchanged for one unit in the other.

Currency exchange rates are derived from the supply and demand in relation to currencies in the international foreign exchange markets. On the one hand, they are influenced by various economic factors, such as the rate of inflation in the relevant country, interest differences abroad, the

assessment of the relevant economic development, the global political situation, the convertibility of one currency into another and the security of a financial investment in the relevant currency. On the other hand, they are influenced by measures undertaken by governments and central banks (e.g. foreign exchange controls and restrictions). In addition to these foreseeable factors, however, other factors might also be relevant that are difficult to estimate, such as factors of a psychological nature (such as crises of confidence in the political leadership of a country or other speculation). In some cases, such psychological factors may have a significant effect on the value of the relevant currency.

- **Particular risks of Securities with interest rates as Underlying**

Interest rates are based on the supply and demand on the international money and capital markets. They are influenced by various economic factors, speculation and measures undertaken by governments and central banks or other political factors. Market interest rates on the money and capital markets are often subject to significant fluctuations, and therefore the holder of Securities relating to interest rates is exposed to such interest rate fluctuation risks.

In the case of the postponement of the redemption of the Notes to the Postponed Maturity Date, the Noteholders shall no longer be entitled to receive the Redemption Amount in accordance with § 4 paragraph [1] or to any payment or interest claim in connection with the postponement of the Maturity Date. In lieu of the Redemption Amount in accordance with § 4 paragraph [1], the Noteholders shall receive per Note

- (a) if the Fund Disruption Event does no longer prevail on the [tenth][•] Payment Business Day prior to the Postponed Maturity Date, an amount in the Issue Currency which shall be equal to the Redemption Amount determined in accordance with § 4 paragraph [1] minus any costs incurred between the originally scheduled Maturity Date and the Postponed Maturity Date and resulting from holding or selling any assets which in the Issuer's reasonable discretion (*billiges Ermessen*) (§315 BGB) were needed in order to hedge price risks or other risks with regard to its obligations under the Notes; or
- (b) if the Fund Disruption Event still prevails on the [tenth][•] Payment Business Day prior to the Redemption Cut-off Date, an amount in the Issue Currency which shall be equal to a redemption amount calculated by applying the net proceeds from a corresponding amount of Fund [Units][Shares] which the Issuer could commercially reasonably have realised from a sale of such Fund [Units][Shares] completed with minimum disruption to their market price until the tenth Payment Business Day prior to the Redemption Cut-off Date. For the avoidance of doubt, any unwinding costs actually incurred under any relevant Hedging Transactions (§ 8 paragraph [3][4]) relating to such Fund [Units][Shares] shall be taken into account for the purpose of calculating the net proceeds from a sale of Fund [Units][Shares].]

These paragraphs 1 - 4 shall be applicable only

1. Subject to the provisions contained in § 5, the Notes will be redeemed

in case of physical delivery

on the Maturity Date either by payment of an amount in the Issue Currency (the "**Redemption Amount**") or by delivery of [ETF] Shares, all as determined by the Issuer in accordance with the following provisions:

- (a) If on the [Final] Valuation Date the Reference Price [A] of the [Worst Performing] Underlying is [equal to or] above [•]% of the [respective] [Initial] [Strike] Price [and/or] if during the Monitoring Period the Reference Price [B] of [the][each] Underlying has always been [equal to or] above [•]% of the [respective] [Initial] [Strike] Price, then each Note shall be redeemed by payment of a Redemption Amount equal to the Denomination; or
 - (b) In all other cases, each Note shall be redeemed by delivery of the Share Amount [with respect to the Worst Performing Underlying] in the form and with the characteristics deliverable on the Maturity Date at the [relevant] Exchange in accordance with its rules.
2. If the delivery of the [ETF] Share Amount [with respect to the Worst Performing Underlying] is economically, factually or legally impossible for the Issuer on the Maturity Date, the Issuer will be entitled, instead of delivering the [ETF] Share Amount [with respect to the Worst Performing Underlying], to pay a monetary amount that corresponds to the Reference Price [A] of the [Worst Performing] Underlying on the [Final] Valuation Date [converted[,if necessary] into the Issue Currency at the [relevant] Conversion Rate].
 3. Fractions of the [Worst Performing] Underlying [or Worst Performing Underlyings in excess of integral multiples of the applicable trading unit (if any)] will not be delivered. The Issuer, instead of delivering the relevant fraction [or Worst Performing Underlyings[†]], may pay an amount in the Issue Currency (the "**Fractional Settlement Amount**") per Note to the Noteholders which will be determined by the Issuer [by multiplying the fraction by] [on the basis of[‡]] the Reference Price [A] of the [Worst Performing] Underlying on the [Final] Valuation Date [and converting[,if necessary] the resulting amount into the Issue Currency at the [relevant] Conversion Rate]. The combination of several Fractional Settlement Amounts into claims for the delivery of the Worst Performing] Underlying is excluded.

§ 7 ADJUSTMENTS

Alternative:

Notes with reference to a share

1. Upon the occurrence of an Adjustment Event or Extraordinary Event each of which has a material effect on the Share or the price of the Share, the Issuer shall make any such adjustments to the Terms and Conditions as are necessary to account for the economic effect of the Adjustment Event or the Extraordinary Event on the Notes and to preserve, to the extent possible, the economic profile that the Notes had prior to the occurrence of the Adjustment Event or Extraordinary Event in accordance with the following provisions (each an "**Adjustment**"). The Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether an Adjustment Event or Extraordinary Event has occurred and whether such Adjustment Event or Extraordinary Event has a material effect on the Share or the price of the Share.
2. An Adjustment may result in:
 - (a) the replacement of the Share by another share and/or cash and/or any other compensation, in each case as stipulated with reference to the relevant Adjustment Event or Extraordinary Event (a "**Replacement**"), and the determination of another stock exchange as the Exchange,

and/or
 - (b) increases or decreases of specified variables and values or the amounts payable under the Notes taking into account:
 - (i) the effect of an Adjustment Event or Extraordinary Event on the price of the Share;
 - (ii) the diluting or concentrative effect of an Adjustment Event or Extraordinary Event on the theoretical value of the Share; or
 - (iii) any cash compensation or other compensation in

connection with a Replacement;

and/or

- (c) consequential amendments to the provisions of the Terms and Conditions that are required to fully reflect the consequences of the Replacement.
3. Adjustments shall correspond to the adjustments to options or futures contracts relating to the Share made by the Futures Exchange (a "**Futures Exchange Adjustment**").
- (a) If the Futures Exchange Adjustment results in the replacement of the Share by a basket of shares, the Issuer shall be entitled to determine that only the share with the highest market capitalisation on the Cut-off Date shall be the (replacement) Share for the purpose of the Notes, and to hypothetically sell the remaining shares in the basket on the first Exchange Business Day following the Cut-off Date at the first available price and hypothetically reinvest the proceeds immediately afterwards in the (replacement) Share by making an appropriate adjustment to the specified variables and values or the amounts payable under the Notes. If the determination of the share with the highest market capitalisation would result in an economic inappropriate Adjustment, the Issuer shall be entitled to select any other share of the basket of shares to be the (replacement) Share in accordance with the forgoing sentence. The Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether this is the case.
 - (b) The Issuer shall not be required to make adjustments to the Terms and Conditions by reference to Futures Exchange Adjustments in cases where:
 - (i) the Futures Exchange Adjustments would result in economically irrelevant adjustments to the Terms and Conditions; the Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether this is the case;
 - (ii) the Futures Exchange Adjustments violate the principles of good faith or would result in adjustments of the Terms and Conditions contrary to the principle to preserve the economic profile that the Notes had prior to the occurrence of the Adjustment Event or the Extraordinary Event and to compensate for the economic effect thereof on the price of the Share; the Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether this is the case; or
 - (iii) in cases where no Futures Exchange Adjustment occurs but where such Futures Exchange Adjustment would be required pursuant to the adjustment rules of the Futures Exchange; in such case, the Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether this is the case and shall make Adjustments in accordance with the adjustment rules of the Futures Exchange.
 - (c) In the event of any doubts regarding the application of the

Futures Exchange Adjustment or adjustment rules of the Futures Exchange or where no Futures Exchange exists, the Issuer shall make such adjustments to the Terms and Conditions which are required in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) to preserve the economic profile that the Notes had prior to the occurrence of the Adjustment Event or the Extraordinary Event and to compensate for the economic effect thereof on the price of the Share.

4. Any reference made to the Share in these Terms and Conditions shall, if the context so admits, then refer to the replacement share. All related definitions shall be deemed to be amended accordingly.
5. Adjustments shall take effect as from the date (the "**Cut-off Date**") determined by the Issuer in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB), provided that (if the Issuer takes into consideration the manner in which adjustments are or would be made by the Futures Exchange) the Issuer shall take into consideration the date at which such adjustments take effect or would take effect at the Futures Exchange.
6. Adjustments as well as their Cut-off Date shall be notified by the Issuer in accordance with § 15.

The Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether an Extraordinary Event has occurred and whether such Extraordinary Event has a material effect on the Index or the level of the Index.
 - (a) An Adjustment may result in:
 - (i) the replacement of the Index by another index (a "**Replacement**"), and/or the replacement of the Index Sponsor by another person, company or institution acceptable to the Issuer as a new index sponsor;and/or
 - (ii) increases or decreases of specified variables and values or the amounts payable under the Notes taking into account:

- (i) The Issuer shall not be required to make adjustments to the Terms and Conditions by reference to [Futures][Related] Exchange Adjustments, in cases where

- (aa) the [Futures][Related] Exchange Adjustments would result in economically irrelevant adjustments to the Terms and Conditions; the Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether this is the case;

- (cc) in cases where no [Futures][Related] Exchange Adjustment occurs but where such [Futures][Related] Exchange Adjustment would be required pursuant to the adjustment rules of the [Futures][Related] Exchange; in such case, the Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether this is the case and shall make Adjustments in accordance with the adjustment rules of the [Futures][Related] Exchange.

- (ii) In the event of any doubts regarding the application of the [Futures][Related] Exchange Adjustment or adjustment rules of the [Futures][Related] Exchange or where no [Futures][Related] Exchange exists, the Issuer shall make such adjustments to the Terms and Conditions which are required in its reasonable discretion (*billiges*

Ermessen) (§ 315 BGB) to preserve the economic profile that the Notes had prior to the occurrence of the Extraordinary Event and to compensate for the economic effect thereof on the level of the Index.

- (c) Any reference made to the Index and/or the Index Sponsor in these Terms and Conditions shall, if the context so admits, then refer to the replacement index and/or the index sponsor of the replacement index. All related definitions shall be deemed to be amended accordingly.
 - (d) Adjustments shall take effect as from the date (the "**Cut-off Date**") determined by the Issuer in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB), provided that (if the Issuer takes into consideration the manner in which adjustments are or would be made by the Futures Exchange) the Issuer shall take into consideration the date at which such adjustments take effect or would take effect at the Futures Exchange.
 - (e) Adjustments as well as their Cut-off Date shall be notified by the Issuer in accordance with § 15.
 - (f) Any adjustment in accordance with this § 7 paragraph 1 does not preclude a subsequent termination in accordance with § 8 on the basis of the same event.
2. If the Index is no longer calculated and published by the Index Sponsor but by another acceptable person, company or institution as the new Index Sponsor (the "**Successor Index Sponsor**"), all amounts payable under the Notes will be determined on the basis of the Index being calculated and published by the Successor Index Sponsor and any reference made to the Index Sponsor in these Terms and Conditions shall, if the context so admits, then refer to the Successor Index Sponsor. The Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether this is the case.
3. If the Index Sponsor materially modifies the calculation method of the Index with effect on or after the [Launch][Strike][Trade] Date, or materially modifies the Index in any other way (except for modifications which are contemplated in the calculation method of the Index relating to a change with respect to any [index components][Index Assets], the market capitalisation or with respect to any other routine measures, each an "**Index Modification**"), then the Issuer is entitled to continue the calculation and publication of the Index on the basis of the former concept of the Index and its last determined level. The Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether an Index Modification has occurred.

§ 7 ADJUSTMENTS

Alternative:

Certificates with reference to a share

1. Upon the occurrence of an Adjustment Event or Extraordinary Event each of which has a material effect on the Share or the price of the Share, the Issuer shall make any such adjustments to the Terms and Conditions as are necessary to account for the economic effect of the Adjustment Event or the Extraordinary Event on the Certificates and to preserve, to the extent possible, the economic profile that the Certificates had prior to the occurrence of the Adjustment Event or Extraordinary Event in accordance with the following provisions (each an "**Adjustment**"). The Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether an Adjustment Event or Extraordinary Event has occurred and whether such Adjustment Event or Extraordinary Event has a material effect on the Share or the price of the Share.
2. An Adjustment may result in:
 - (a) the replacement of the Share by another share and/or cash and/or any other compensation, in each case as stipulated with reference to the relevant Adjustment Event or Extraordinary Event (a "**Replacement**"), and the determination of another stock exchange as the Exchange,

and/or

- (b) increases or decreases of specified variables and values or the amounts payable under the Certificates taking into account:
 - (i) the effect of an Adjustment Event or Extraordinary Event on the price of the Share;
 - (ii) the diluting or concentrative effect of an Adjustment Event or Extraordinary Event on the theoretical value of the Share; or
 - (iii) any cash compensation or other compensation in connection with a Replacement;

and/or

- (c) consequential amendments to the provisions of the Terms and Conditions that are required to fully reflect the consequences of the Replacement.
3. Adjustments shall correspond to the adjustments to options or futures contracts relating to the Share made by the Futures Exchange (a "**Futures Exchange Adjustment**").
- (a) If the Futures Exchange Adjustment results in the replacement of the Share by a basket of shares, the Issuer shall be entitled to determine that only the share with the highest market capitalisation on the Cut-off Date shall be the (replacement) Share for the purpose of the Certificates, and to hypothetically sell the remaining shares in the basket on the first Exchange Business Day following the Cut-off Date at the first available price and hypothetically reinvest the proceeds immediately afterwards in the (replacement) Share by making an appropriate adjustment to the specified variables and values or the amounts payable under the Certificates. If the determination of the share with the highest market capitalisation would result in an economic inappropriate Adjustment, the Issuer shall be entitled to select any other share of the basket of shares to be the (replacement) Share in accordance with the forgoing sentence. The Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether this is the case.
 - (b) The Issuer shall not be required to make adjustments to the Terms and Conditions by reference to Futures Exchange Adjustments in cases where:
 - (i) the Futures Exchange Adjustments would result in economically irrelevant adjustments to the Terms and Conditions; the Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether this is the case;
 - (ii) the Futures Exchange Adjustments violate the principles of good faith or would result in adjustments of the Terms and Conditions contrary to the principle to preserve the economic profile that the Certificates had prior to the occurrence of the Adjustment Event or the Extraordinary Event and to compensate for the economic effect thereof

on the price of the Share; the Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether this is the case; or

- (iii) in cases where no Futures Exchange Adjustment occurs but where such Futures Exchange Adjustment would be required pursuant to the adjustment rules of the Futures Exchange; in such case, the Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether this is the case and shall make Adjustments in accordance with the adjustment rules of the Futures Exchange.
- (c) In the event of any doubts regarding the application of the Futures Exchange Adjustment or adjustment rules of the Futures Exchange or where no Futures Exchange exists, the Issuer shall make such adjustments to the Terms and Conditions which are required in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) to preserve the economic profile that the Certificates had prior to the occurrence of the Adjustment Event or the Extraordinary Event and to compensate for the economic effect thereof on the price of the Share.
- 4. Any reference made to the Share in these Terms and Conditions shall, if the context so admits, then refer to the replacement share. All related definitions shall be deemed to be amended accordingly.
 - 5. Adjustments shall take effect as from the date (the "**Cut-off Date**") determined by the Issuer in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB), provided that (if the Issuer takes into consideration the manner in which adjustments are or would be made by the Futures Exchange) the Issuer shall take into consideration the date at which such adjustments take effect or would take effect at the Futures Exchange.
 - 6. Adjustments as well as their Cut-off Date shall be notified by the Issuer in accordance with § 14.

1. Upon the occurrence of an Adjustment Event or Extraordinary Event each of which has a material effect on the Share or the price of the Share, the Issuer shall make any such adjustments to the Terms and Conditions as are necessary to account for the economic effect of the Adjustment Event or the Extraordinary Event on the Warrants and to preserve, to the extent possible, the economic profile that the Warrants had prior to the occurrence of the Adjustment Event or Extraordinary Event in accordance with the following provisions (each

an "**Adjustment**"). The Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether an Adjustment Event or Extraordinary Event has occurred and whether such Adjustment Event or Extraordinary Event has a material effect on the Share or the price of the Share.

2. An Adjustment may result in:

(a) the replacement of the Share by another share and/or cash and/or any other compensation, in each case as stipulated with reference to the relevant Adjustment Event or Extraordinary Event (a "**Replacement**"), and the determination of another stock exchange as the Exchange,

and/or

(b) increases or decreases of specified variables and values or the amounts payable under the Warrants taking into account:

(i) the effect of an Adjustment Event or Extraordinary Event on the price of the Share;

(ii) the diluting or concentrative effect of an Adjustment Event or Extraordinary Event on the theoretical value of the Share; or

(iii) any cash compensation or other compensation in connection with a Replacement;

and/or

(c) consequential amendments to the provisions of the Terms and Conditions that are required to fully reflect the consequences of the Replacement.

3. Adjustments shall correspond to the adjustments to options or futures contracts relating to the Share made by the Futures Exchange (a "**Futures Exchange Adjustment**").

(a) If the Futures Exchange Adjustment results in the replacement of the Share by a basket of shares, the Issuer shall be entitled to determine that only the share with the highest market capitalisation on the Cut-off Date shall be the (replacement) Share for the purpose of the Warrants, and to hypothetically sell the remaining shares in the basket on the first Exchange Business Day following the Cut-off Date at the first available price and hypothetically reinvest the proceeds immediately afterwards in the (replacement) Share by making an appropriate adjustment to the specified variables and values or the amounts payable under the Warrants. If the determination of the share with the highest market capitalisation would result in an economic inappropriate Adjustment, the Issuer shall be entitled to select any other share of the basket of shares to be the (replacement) Share in accordance with the forgoing sentence. The Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether this is the case.

- (b) The Issuer shall not be required to make adjustments to the Terms and Conditions by reference to Futures Exchange Adjustments in cases where:
 - (i) the Futures Exchange Adjustments would result in economically irrelevant adjustments to the Terms and Conditions; the Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether this is the case;
 - (ii) the Futures Exchange Adjustments violate the principles of good faith or would result in adjustments of the Terms and Conditions contrary to the principle to preserve the economic profile that the Warrants had prior to the occurrence of the Adjustment Event or the Extraordinary Event and to compensate for the economic effect thereof on the price of the Share; the Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether this is the case; or
 - (iii) in cases where no Futures Exchange Adjustment occurs but where such Futures Exchange Adjustment would be required pursuant to the adjustment rules of the Futures Exchange; in such case, the Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether this is the case and shall make Adjustments in accordance with the adjustment rules of the Futures Exchange.
 - (c) In the event of any doubts regarding the application of the Futures Exchange Adjustment or adjustment rules of the Futures Exchange or where no Futures Exchange exists, the Issuer shall make such adjustments to the Terms and Conditions which are required in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) to preserve the economic profile that the Warrants had prior to the occurrence of the Adjustment Event or the Extraordinary Event and to compensate for the economic effect thereof on the price of the Share.
4. Any reference made to the Share in these Terms and Conditions shall, if the context so admits, then refer to the replacement share. All related definitions shall be deemed to be amended accordingly.
 5. Adjustments shall take effect as from the date (the "**Cut-off Date**") determined by the Issuer in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB), provided that (if the Issuer takes into consideration the manner in which adjustments are or would be made by the Futures Exchange) the Issuer shall take into consideration the date at which such adjustments take effect or would take effect at the Futures Exchange.
 6. Adjustments as well as their Cut-off Date shall be notified by the Issuer in accordance with § 13.

Alternative:	Warrants with reference to ETF shares
--------------	---------------------------------------

1. Upon the occurrence of an Extraordinary Event which has a material effect on the ETF Share or the price of the ETF Share, the Issuer shall make any such adjustments to the Terms and Conditions as are necessary to account for the economic effect of the Extraordinary Event on the Warrants and to preserve, to the extent possible, the economic profile that the Warrants had prior to the occurrence of the Extraordinary Event in accordance with the following provisions (each an "**Adjustment**"). The Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether an Extraordinary Event has occurred and whether such Extraordinary Event has a material effect on the ETF Share or the price of the ETF Share.
2. An Adjustment may result in:
 - (a) the replacement of the ETF Share by another ETF share and/or cash and/or any other compensation, in each case as stipulated with reference to the relevant Extraordinary Event (a "**Replacement**"), and the determination of another stock exchange as the Exchange,
 - (b) the replacement of the Fund by a fund (a "**Substitution Fund**") [with similar characteristics, investment objectives and policies to those of the Fund immediately prior to the occurrence of the Extraordinary Event] [that (1) is denominated in the same currency as the ETF Share, (2) has the same or similar characteristics and features as the Fund and (3) has similar investment objectives and policies to those of the Fund immediately prior to the occurrence of the Extraordinary Event] (a "**Substitution**").

Any Substitution shall occur on the basis of the NAV as of the Exchange Business Day immediately prior to the occurrence of the Extraordinary Event if the Extraordinary Event was announced at least [*number*] Exchange Business Days prior to such occurrence, and otherwise the NAV as of the Exchange Business Day immediately subsequent to the occurrence of the Extraordinary Event (the "**Removal Value**");
 - (c) increases or decreases of specified variables and values or the amounts payable under the Warrants taking into account:
 - (i) the effect of an Extraordinary Event on the NAV;
 - (ii) the diluting or concentrative effect of an Extraordinary Event on the theoretical value of the ETF Share;

- (iii) the Removal Value or any fraction thereof in connection with a Substitution; or
- (iv) any cash compensation or other compensation in connection with a Replacement or a Substitution;

and/or

- (d) consequential amendments to the provisions of the Terms and Conditions that are required to fully reflect the consequences of the Replacement or the Removal Value or the Substitution.
3. Adjustments shall correspond to the adjustments to options or futures contracts relating to the ETF Share made by the Futures Exchange (a "**Futures Exchange Adjustment**").
- (a) If the Futures Exchange Adjustment results in the replacement of the ETF Share by a basket of ETF shares, the Issuer shall be entitled to determine that only the ETF share with the highest market capitalisation on the Cut-off Date shall be the (replacement) ETF Share for the purpose of the Warrants, and to hypothetically sell the remaining ETF shares in the basket on the first Exchange Business Day following the Cut-off Date at the first available price and hypothetically reinvest the proceeds immediately afterwards in the (replacement) ETF Share by making an appropriate adjustment to the specified variables and values or the amounts payable under the Warrants. If the determination of the share with the highest market capitalisation would result in an economic inappropriate Adjustment, the Issuer shall be entitled to select any other ETF share of the basket of ETF shares to be the (replacement) ETF Share in accordance with the forgoing sentence. The Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether this is the case.
 - (b) The Issuer shall not be required to make adjustments to the Terms and Conditions by reference to Futures Exchange Adjustments, in cases where:
 - (i) the Futures Exchange Adjustments would result in economically irrelevant adjustments to the Terms and Conditions; the Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether this is the case;
 - (ii) the Futures Exchange Adjustments violate the principles of good faith or would result in adjustments of the Terms and Conditions contrary to the principle to preserve the economic profile that the Warrants had prior to the occurrence of the Extraordinary Event and to compensate for the economic effect thereof on the price of the Share; the Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether this is the case; or
 - (iii) in cases where no Futures Exchange Adjustment occurs but where such Futures Exchange Adjustment would be required pursuant to the adjustment rules of

the Futures Exchange; in such case, the Issuer shall decide in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) whether this is the case and shall make Adjustments in accordance with the adjustment rules of the Futures Exchange.

- (c) In the event of any doubts regarding the application of the Futures Exchange Adjustment or adjustment rules of the Futures Exchange or where no Futures Exchange exists, the Issuer shall make such adjustments to the Terms and Conditions which are required in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) to preserve the economic profile that the Warrants had prior to the occurrence of the Extraordinary Event and to compensate for the economic effect thereof on the price of the ETF Share.
4. Any reference made to the ETF Share in these Terms and Conditions shall, if the context so admits, then refer to the replacement share. All related definitions shall be deemed to be amended accordingly.
 5. Adjustments shall take effect as from the date (the "**Cut-off Date**") determined by the Issuer in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB), provided that (if the Issuer takes into consideration the manner in which adjustments are or would be made by the Futures Exchange) the Issuer shall take into consideration the date at which such adjustments take effect or would take effect at the Futures Exchange.

§ 14 LIMITATION OF LIABILITY; PRESENTATION PERIODS; PRESCRIPTION

1. The Issuer shall be held responsible for acting or failing to act in connection with the Warrants only if, and insofar as, it either breaches material obligations under or in connection with the Terms and Conditions of the Warrants negligently or wilfully or breaches other obligations with gross negligence or wilfully. The same applies to the Warrant Agent [and the Euroclear Registrar].
2. The period for presentation of the Warrants (§ 801, paragraph 1, sentence 1 BGB) shall be ten years and the period of limitation for claims under the Warrants presented during the period for presentation shall be two years calculated from the expiry of the relevant presentation period.

§ 15 FINAL CLAUSES

1. The Warrants and the rights and duties of the Warrantholders, the Issuer, the Warrant Agent and the Guarantor (if any) shall in all respects be governed by the laws of the Federal Republic of Germany.
2. In the event of manifest typing or calculation errors or similar manifest errors in the Terms and Conditions, the Issuer shall be entitled to declare rescission (*Anfechtung*) to the Warrantholders. The declaration of rescission shall be made without undue delay upon becoming aware of any such ground for rescission (*Anfechtungsgrund*) and in accordance with § 13. Following such rescission by the Issuer, the Warrantholder may instruct the

account holding bank to submit a duly completed [redemption] [termination] notice to the Warrant Agent, either by filling in the relevant form available from the Warrant Agent or by otherwise stating all information and declarations required on the form (the "**Rescission [Redemption] [Termination] Notice**") and to request repayment of the [Issue] [Termination] Price against transfer of the Warrants to the account of the Warrant Agent with the Clearing System. The Issuer shall make available the Issue Price to the Warrant Agent within [number] calendar days following receipt of the Rescission [Redemption] [Termination] Notice and of the Warrants by the Warrant Agent, whichever receipt is later, whereupon the Warrant Agent shall transfer the [Issue] [Termination] Price to the account specified in the Rescission [Redemption] [Termination] Notice. Upon payment of the [Issue] [Termination] Price all rights under the Warrants delivered shall expire.

3. The Issuer may combine the declaration of rescission pursuant to paragraph 2 above with an offer to continue the Warrants on the basis of corrected Terms and Conditions. Such an offer and the corrected provisions shall be notified to the Warranholders together with the declaration of rescission in accordance with § 13. Any such offer shall be deemed to be accepted by a Warranholder (and the rescission shall not take effect), unless the Warranholder requests repayment of the [Issue] [Termination] Price within four weeks following the date on which the offer has become effective in accordance with § 13 by delivery of a duly completed Rescission [Redemption] [Termination] Notice to the Warrant Agent and by transfer of the Warrants to the account of the Warrant Agent with the Clearing System pursuant to paragraph 2 above. The Issuer shall refer to this effect in the notification.
4. "[Issue] [Termination] Price" within the meaning of paragraph 2 and 3 above shall be deemed to be the higher of (i) the purchase price that was actually paid by the relevant Warranholder (as declared and proved by evidence in the request for repayment) and (ii) the weighted average (as determined by the Issuer in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB) of the traded prices of the Warrants on the [Business Day] preceding the declaration of rescission pursuant to paragraph 2 above. *[the following sentence is not applicable for exchange rates as Underlying.]* [If a [[Market] [Fund] Disruption Event] [Price Source Disruption or a Trading Disruption] exists on the [Business Day] preceding the declaration of rescission pursuant to paragraph 2, the last [Business Day] preceding the declaration of rescission pursuant to paragraph 2 on which no [[Market] [Fund] Disruption Event] [Price Source Disruption and no Trading Disruption] existed shall be decisive for the ascertainment of price pursuant to the preceding sentence.]
5. Contradictory or incomplete provisions in the Terms and Conditions may be corrected or amended, as the case may be, by the Issuer in its reasonable discretion (*billiges Ermessen*) (§ 315 BGB). The Issuer, however, shall only be entitled to make such corrections or amendments which are reasonably acceptable to the Warranholders having regard to the interests of the Issuer and in particular which do not materially adversely affect the legal or financial situation of the Warranholders. Notice of any such correction or amendment shall be given to the Warranholders in accordance with § 13.

6. If the Warrantholder was aware of typing or calculation errors or similar errors at the time of the acquisition of the Warrants, then, notwithstanding paragraphs 2 - 5, the Warrantholder can be bound by the Issuer to the corrected Terms and Conditions.
7. Should any provision of these Terms and Conditions be or become void in whole or in part, the other provisions shall remain in force. The void provision shall be replaced by a valid provision that reflects the economic intent of the void provision as closely as possible in legal terms. In those cases, however, the Issuer may also take the steps described in paragraphs 2 - 5 above.
8. Place of performance is Frankfurt am Main.
9. Place of jurisdiction for all disputes and other proceedings in connection with the Warrants for merchants, entities of public law, special funds under public law and entities without a place of general jurisdiction in the Federal Republic of Germany is Frankfurt am Main. In such a case, the place of jurisdiction in Frankfurt am Main shall be an exclusive place of jurisdiction.
10. The English version of these Terms and Conditions shall be binding. Any translation is for convenience only.
